Light-Cured Bonding Adhesive for Metal and Ceramic Appliances

FLOWABLE VISCOSITY

When you need a strong adhesive with superior control and delivery, turn to Opal Bond Flow adhesive. Its syringe delivery system pairs with the Opal Bond Flow tip for smooth and easy placement. And its ideal formulation helps prevent slumping, keeping Opal Bond Flow adhesive right where you need it.

- Ideal for permanent retainers, bite ramps, occlusal buildups, and indirect bonding
- Compatible with any light-cured bonding system
- Convenient syringe delivery
- Available in two shades: Blue and A2

With its low-slumping formula, Opal Bond Flow adhesive stays right where you need it.
