Umbrella™ Retractor

Developed to give you a clear treatment field while making patient comfort a top priority:

- 💧 Easy to place
- 💧 Disposable
- 💧 Naturally and gently helps the patient hold their mouth open without pulling or stretching their lips
- 💧 A new, innovative tongue-retraction design allows the tongue to comfortably rest behind the tongue guard, keeping it back and away from the working area
- 💧 Designed with anatomically placed/shaped bumpers, so clinicians can rest a hand on the patient's mouth without causing discomfort
- 💧 Provides relief and comfort to gaggers—it doesn't initiate the gag reflex for most
- 💧 Can be kept in place when checking bite
- 💧 Achieve a dry working environment

PropGard™ Mouth Prop

Our PropGard mouth prop protects the tongue from trauma and prevents contamination from tongue and mouth closure.

- 💧 PropGard™ mouth prop protects adjacent teeth and tongue

OraSeal™ Caulking and Putty

OraSeal™ Caulking and Putty materials effectively adhere to a dental dam, tissue, teeth, and metal even when under water or saliva.

- 💧 Excel at preventing leakage during treatment
- 💧 Protect the gingiva from exposure to peroxide or hydrofluoric acid
- 💧 Block out unwanted spaces for impressions
- 💧 In conjunction with the tear-resistant DermaDam rubber or DermaDam™ Synthetic dental dam, it's easy to achieve a dry working environment

DermaDam™ Rubber Dam

DermaDam rubber dental dam is made from powder-free pure latex rubber. It has a low dermatitis potential and the lack of powder reduces the occurrence of allergic reactions.

- 💧 DermaDam Synthetic dental dam is not made with natural rubber latex but is designed to be just as flexible and durable
