SATURDAY

7:15 a.m. – 8:00 a.m.	Breakfast
8:00 a.m. – Noon	Meeting/Hands On
Noon	Departures

Course Information

ADHESIVE DENTISTRY. WHY YOUR STUFF DOESN'T STICK!

All adhesives on the market claim "High Bond Strengths." How does a practicing dentist even know what that means? You will see how they perform relative to one another when tested on both dentin and enamel. You will also learn how the application of adhesives can be dramatically impacted by you, the practitioner. What we do matters! Learn how curing lights impact this process and get past the marketing hype. Cementation of an indirect prosthesis can be a maze of materials and techniques. We will unravel the confusion with regards to cementing or bonding Zirconia, Lithium Disilicate, and others.

Learning Objectives:

- How do various adhesives compare
- What can I do to maximize bond strengths of my adhesive
- Choosing a curing light
- What can I do to maximize my curing light's potential
- Cementation of Lithium Disilicate, Zirconia, etc.

DR. SHEA BESS

Dr. Shea Bess graduated from the University of Utah in 1998 in Medical Biology, and received his DDS from Loma Linda University in 2002. Dr. Bess lectures all over the United States on cosmetic and restorative dentistry. For his full bio, visit ultradent.com/events.

NEW ADVANCES IN DIRECT AND INDIRECT RESTORATIVE DENTISTRY OVERCOMING COMMON PAIN POINTS, PITFALLS, AND PROBLEMS IN PRIVATE PRACTICE

This fast paced, informative session will introduce the participants to several new materials and techniques in restorative dentistry designed to simplify clinical practice and yield predictable, problem free restorations. Various clinical tips and techniques will be introduced designed to eliminate common problems associated with routine clinical procedures. They will include: creating perfect Class II restorations, mastering flawless crown and bridge impressions, enhancing esthetics in anterior direct bonding cases, and proper adhesion and curing protocols. Additionally, techniques to improve clinical outcomes with conventional crown and bridge procedures will be discussed.

Learning Objectives:

- Understand the steps involved in creating the perfect Class II composite restoration
- Master appropriate bonding and curing protocols.
- Review appropriate layering techniques to enhance esthetics of anterior bonding cases
- Gain knowledge of modern ceramic materials and understand limitations and strengths of each type of material
- Develop a better understanding of the indications and contraindications of each material
- Learn predictable techniques designed to capture flawless impressions the first time they are attempted
- Improve clinical outcomes of conventional crown and bridge through the use of modern, predictable techniques and materials

DR. MARC GEISSBERGER

Dr. Marc Geissberger is a former full professor and past Chair of the Department of Integrated Reconstructive Dental Sciences at University of the Pacific, School of Dentistry. He is a fellow of the American Dental Education Association's leadership institute, researcher, as well as a published author in the areas of dental materials, contemporary fixed prosthodontics, and esthetic dentistry.
