

The Opalescence™ teeth whitening menu

customized

Opalescence™ PF whitening gel offers professional whitening in the comfort of your own home. This take-home whitening treatment is delivered via custom-made trays that are tailored to your smile. Opalescence PF whitening gel is available a variety of concentrations for different wear times and is available in Mint, Melon, and Regular flavors.

ready-to-go

Opalescence Go™ whitening comes in prefilled, disposable trays that comfortably adapt to any smile for professional ready-to-go whitening. Opalescence Go whitening is effective and easy to use. Its unique UltraFit™ tray easily conforms to your teeth and provides molar-to-molar coverage, whitening your entire smile. Opalescence Go whitening is available in two concentrations for different wear times and is available in Mint or Melon flavors.

in-office

Opalescence™ Boost™ whitening is a 40% hydrogen peroxide whitening gel that offers brighter, whiter teeth after about an hour in the dental chair. Opalescence Boost whitening is chemically activated and requires no uncomfortable lights or lasers. It is a safe and effective way to get a brighter, whiter smile.

aftercare

Opalescence™ Whitening Toothpaste is formulated to strengthen enamel and help prevent cavities while actively removing surface stains for whiter teeth. It is gentle enough to use every day and has a unique Cool Mint flavor for fresh breath that lasts. It is also available in a Sensitivity Relief formula, which has all the benefits as the Original formula, plus potassium nitrate to treat sensitive teeth.

sensitivity

UltraEZ™ desensitizing gel contains PF (potassium nitrate and fluoride) that can quickly treat sensitivity from whitening. It is available in prefilled, disposable UltraFit™ trays or in syringes for use with custom trays.
