

Choosing an enrollment method

When it comes to enrolling devices into SimpleMDM, there are four options to choose from. Answer a few questions about your Apple fleet to determine the best one for you.

Automated enrollment (DEP)

- Easiest method for enrolling newly purchased devices
- Supervised mode supported
- Unremovable MDM enrollment supported

Enroll by link

- Easiest method for enrolling only a device or 2
- Supervised mode not supported, except for macOS
- Unremovable MDM enrollment not supported

User enrollment

- More limited type of enrollment
- Best for BYOD scenarios
- Requires a Managed Apple ID from Apple Business Manager
- Supervised mode not supported
- Unremovable MDM enrollment not supported

Apple Configurator

- Most intensive type of enrollment
- Supervised mode supported
- Unremovable MDM enrollment supported (after 30 days) — only when used to add a device to ABM for automated enrollment
