GUIDE: Questions to Ask Your Human Biological Specimen Provider

POSTER: BioIVT Triple Format (FFPE/FF, CNB/FNA) Specimen Collection for Diagnostic Assay Development

BROCHURE: Donor Center Capabilities

BROCHURE: POC Testing Services

BROCHURE: Reagents

About BioIVT

BioIVT, formerly BioReclamationIVT, is a leading global provider of high-quality biological specimens and value-added services. We specialize in control and disease state samples including human and animal tissues, cell products, blood and other biofluids. Our unmatched portfolio of clinical specimens directly supports precision medicine research and the effort to improve patient outcomes by coupling comprehensive clinical data with donor samples. As the world's premier supplier of ADME-Tox model systems, including hepatocytes and subcellular fractions, BioIVT enables scientists to better understand the pharmacokinetics and drug metabolism of newly discovered compounds and the effects on disease processes. By combining our technical expertise, exceptional customer service, and unparalleled access to biological specimens, BioIVT serves the research community as a trusted partner in ELEVATING SCIENCE.®

Solutions for Diagnostic R&D, Validation and Manufacturing

Solutions for Diagnostic Development and Manufacturing

Your Trusted Source for Biospecimens

Discovery

- Extensive representative donor cohorts
- Wide-breadth of matrices
- Fixed, frozen or fresh formats

Validation/Verification

- Clinical remnants with known associated test values
- Panel availability with specimens across different test ranges
- IRB-approved collections
- Control matrices

POC Services

- US and UK donor centers with on-site collection and testing services
- FDA (US) and HTA (UK) registration and license
- Recruitment expertise for clinical indications

Manufacturing

- Reliable, high first pass disease state bulk plasma
- Plasma from plasmapheresis or FDA licensed human source plasma
- Immunology reagents & synthetic products

Disease State Tissues

At BioIVT, we understand that how a specimen is collected impacts its downstream use. That's why for over 20 years, we have used the same high standards to prospectively collect biospecimens for our ASTERAND® Human Tissue Repository. Today, this repository contains over 300,000 high-quality, thoroughly characterized and validated tissues with associated biofluids, all intended to support companion diagnostic processes.

ASTERAND®
HUMAN TISSUE SPECIMENS

Independent Board-certified Pathology

NGS sequenced specimens

Comprehensive data

Normal Human and Animal Biospecimens

We offer a wide range of normal human and animal biological matrices. Our samples are readily available and customized to your specifications. Sample types include whole blood, serum, plasma, urine, cerebral spinal fluid (CSF), fresh, FFPE and fresh frozen tissue.

Customization based on any inclusion / exclusion criteria

Ability to provide biospecimens from any commercial animal species

Wide selection of inventory

Human Anti-Mouse Antibody (HAMA)

Rheumatoid Factor

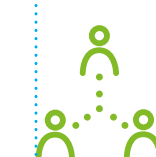

Immunoglobulin Inhibiting Reagent (IIR)

Immunology Reagents

We offer reagents specifically designed for your IVD research and kits.

Customizable collections for specific inclusion and exclusion criteria

Industry-leading clinical collection network

Complete clinical data

Disease State Biofluids

With over 200-IRB approved clinical sites, BioIVT provides clinical specimens for nearly all disease states, confirmed positive or negative. Collected to your specifications, we will provide clinical diagnosis, antibody or viral titer, test method, and additional laboratory data, such as age, sex and treatment information

Immune Cell Products & Services

For researchers looking to accelerate their cell assay workflows, BioIVT provides the cell isolation expertise needed to deliver high-quality PBMCs and other immune cell subsets. With our rigorous QC testing, we ensure reproducible results and eliminate upstream variability. With our ready-to-ship cell inventory, we get the cells you want, when you want them.

Reduce time & resources

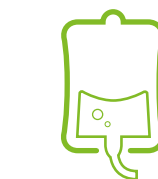

High-quality cells

Ready-to-use cells with guaranteed concentration & purity

Bulk Biofluid Solutions

From apheresed and source plasma to bulk disease state plasma, our high first pass rate means we can provide the bulk plasma samples you need as controls.

Source Plasma

Plasma Apheresed

Diseased Plasma
