

# Streamline Your Cell Culture

## Get MORE Cells in LESS Time with Human AB Serum!

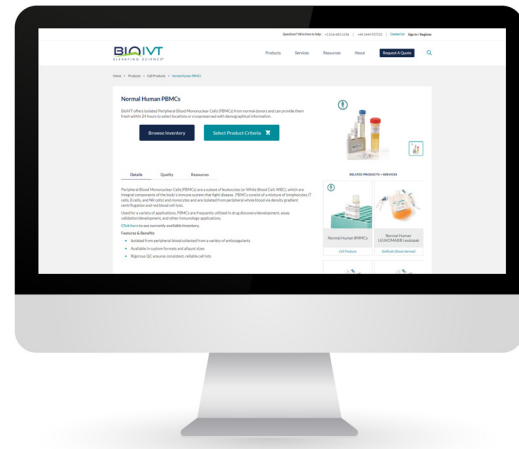

Chemically defined media can only take your cell culture research so far. Get closer to *in vivo* with Human AB Serum!

- **GMP-** and **research-grade**
- **Plasma-derived** or **off-the-clot** varieties are available
- **Heat inactivation** available to further reduce variability
- Specific lots can be recreated with our **recallable donors**

Learn more about our serum solutions at [blog.BioIVT.com](https://blog.bioivt.com).

## Ordering is Easy on the BioIVT.com Digital Portal

With BioIVT's reimagined digital portal, you can instantly generate quotes and purchase orders.

- Find instant pricing for standard products
- Select specific lots
- Browse inventory by:
  - Cell type
  - Vial size
  - Disease state
- Access product documentation and more!

Create an account today at

# ELEVATE Your Science with Our Experts!

## Speak with Our Specialists

Before you place an order, get one-on-one assistance from our Immune Cell Specialists. We'll work with you to make sure you get the products you need, customized for your research workflow.

## Explore Our Publication-Ready Products

Our immune cell products have been used in published research, on topics including:

- Transformation methods for ex vivo cell therapies
- Assessing memory T cells in vaccine studies
- Single-cell assay development
- And more!

See other cutting-edge topics in our "Selected Immune Cell Publications" guide.

## About BioIVT

BioIVT is a leading global provider of high-quality biological specimens and value-added services. We specialize in control and disease state samples including human and animal tissues, cell products, blood and other biofluids. Our unmatched portfolio of clinical specimens directly supports precision medicine research and the effort to improve patient outcomes by coupling comprehensive clinical data with donor samples. As the world's premier supplier of ADME-Tox model systems, including hepatocytes and subcellular fractions, BioIVT enables scientists to better understand the pharmacokinetics and drug metabolism of newly discovered compounds and the effects on disease processes. By combining our technical expertise, exceptional customer service, and unparalleled access to biological specimens, BioIVT serves the research community as a trusted partner in ELEVATING SCIENCE.®

## Immunology & Immune Cell Products

Cell & Gene Therapy | Regenerative Medicine | Immunotherapy

# We Have What You Need

An immune cell provider should be more than a *supplier*, which is why BioIVT wants to be your partner. With our comprehensive portfolio of high-quality products, we're ready to support your research, wherever it may take you.

## Extensive, Characterized Donor Populations

### Normal Human

- >400 recallable donors
- Diverse donor pool
- HLA-typing, Fc receptor genotyping, & CMV testing

### Animal Species

Cynomolgus | Rhesus | Mouse strains | Rat strains | Canine

- Recallable animals
- CITES permits available
- Species optimized isolation protocols

### Disease State

Oncology | Autoimmune  
Inflammatory | Infectious Disease

- >300 IRB-approved sites
- 300+ clinical data points
- MM, ALL, SLE, HBV, and more

## Industry-Leading Quality

### Immune Cell Isolations

- Viability over 70%, fresh or cryopreserved
- Ultra-pure isolations over 85% by cell subtype

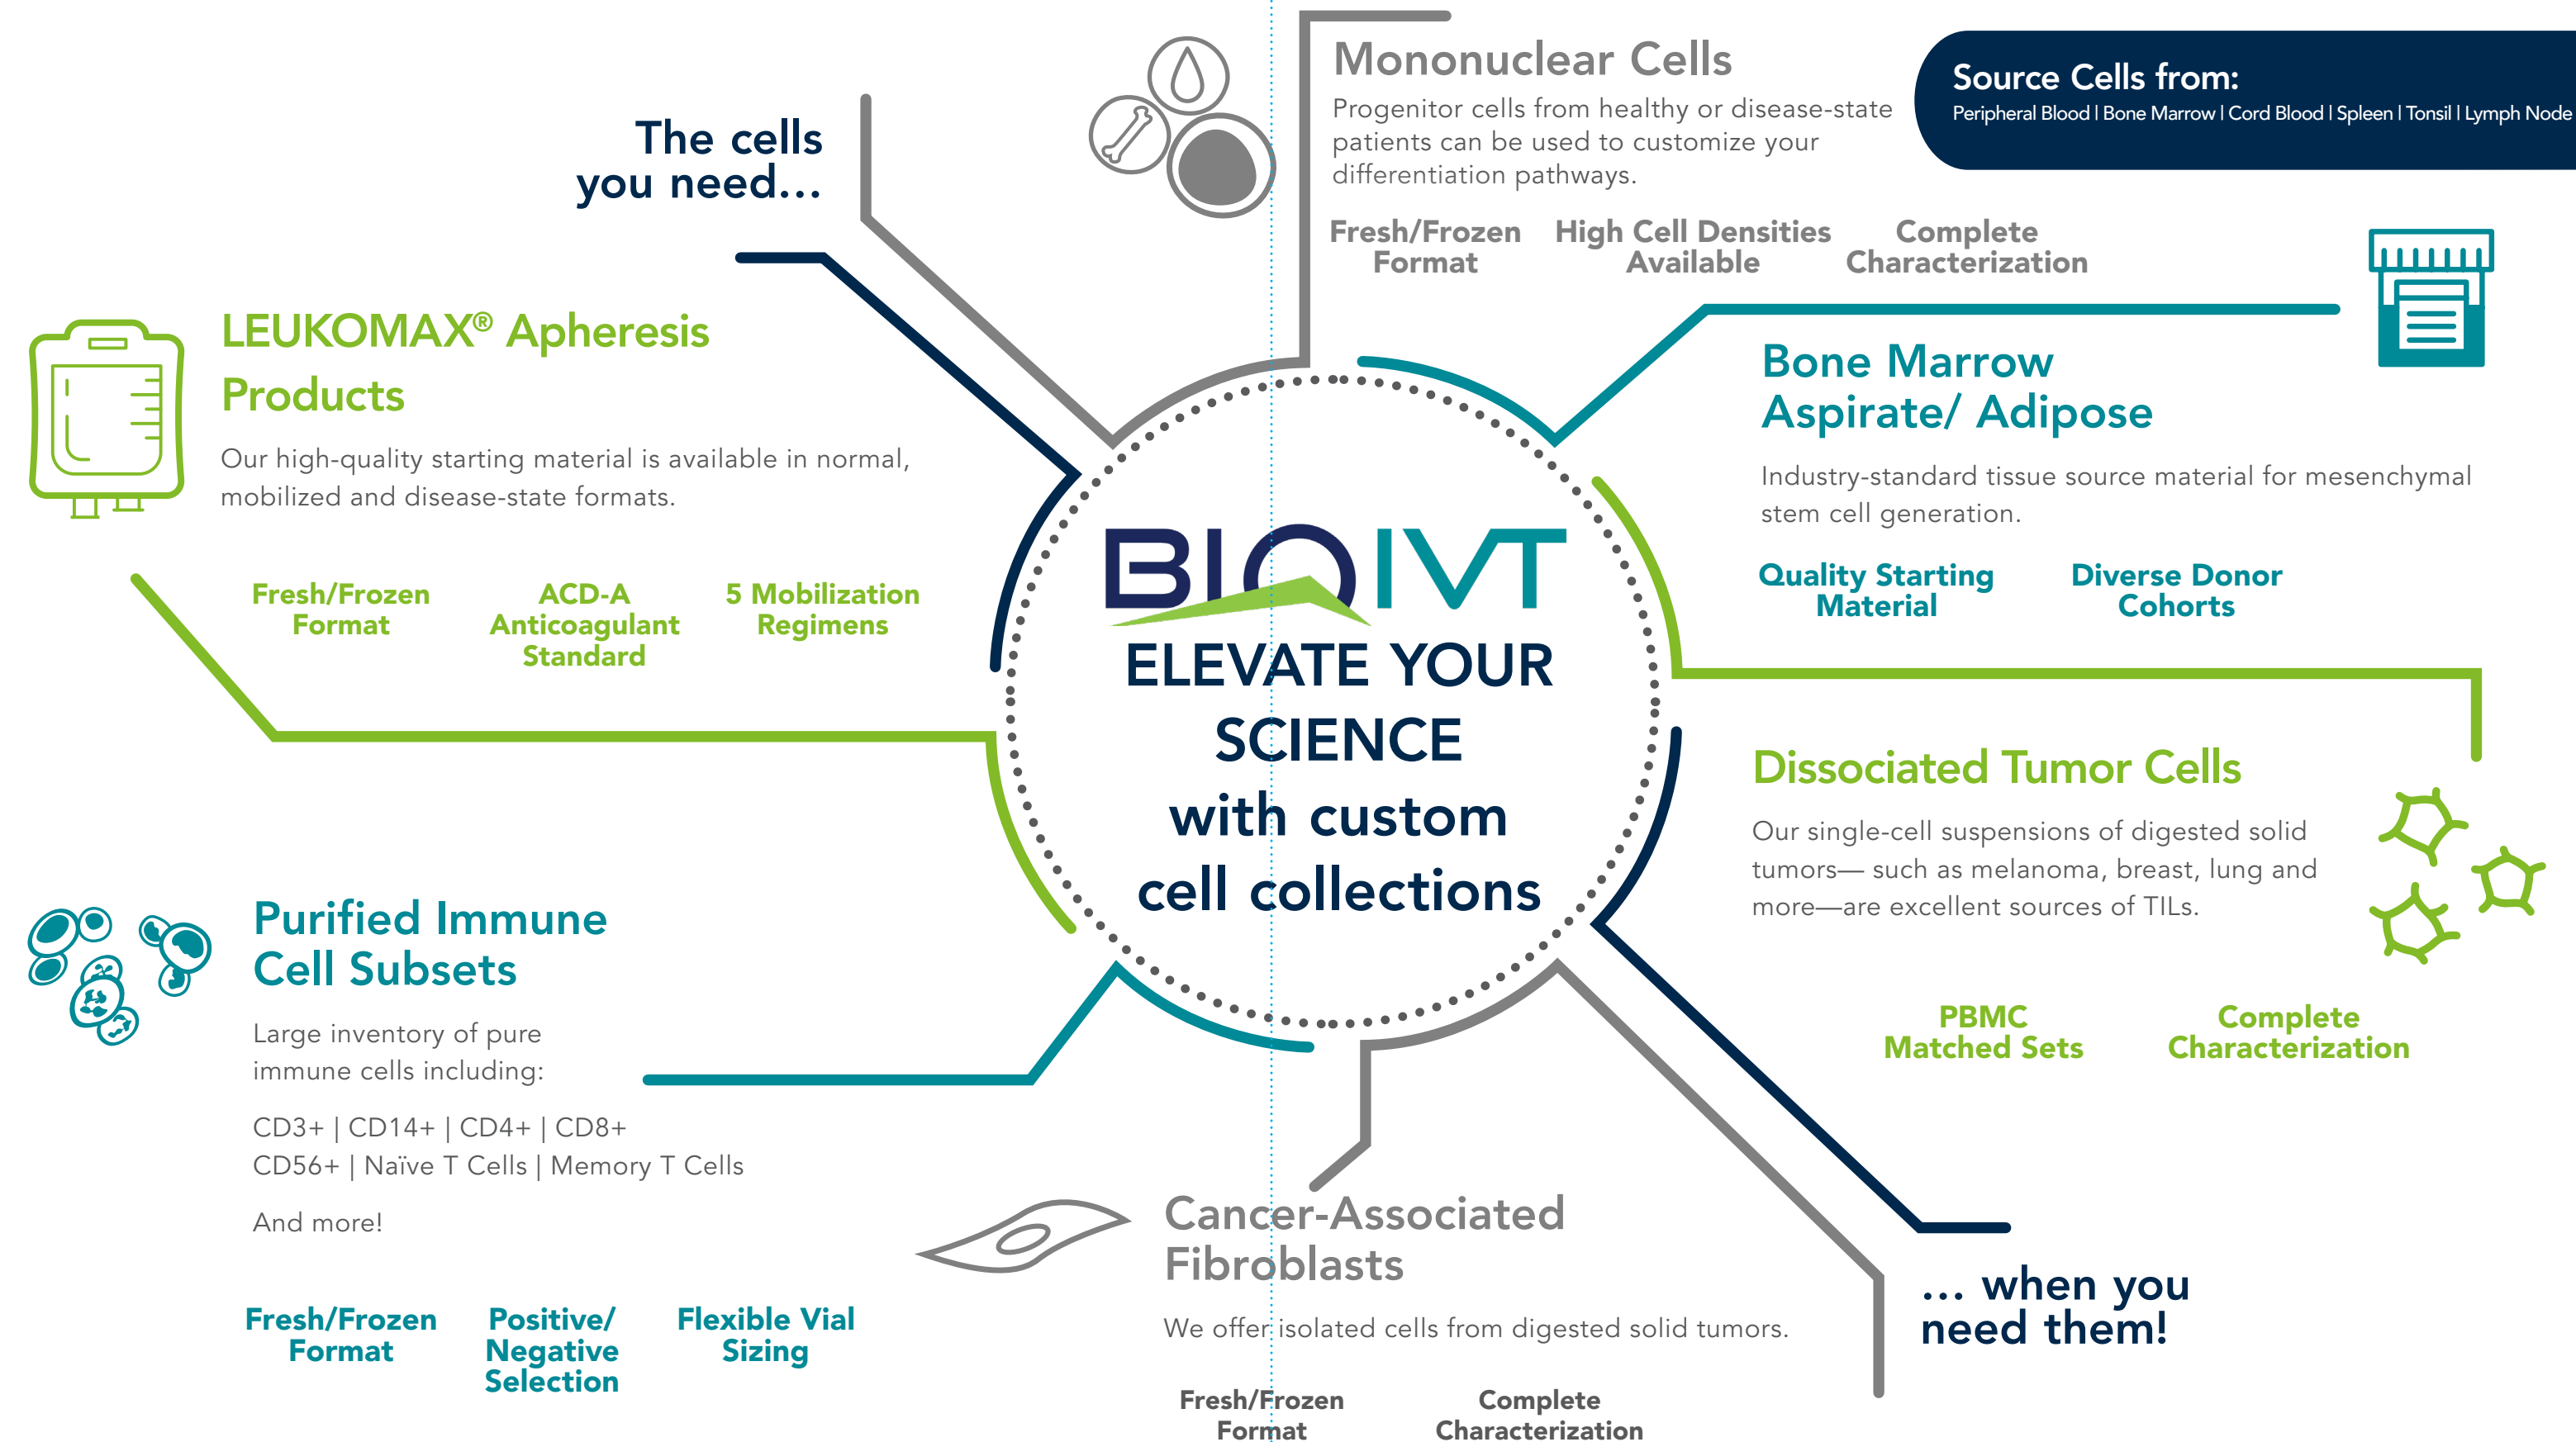

### LEUKOMAX® Leukopaks

- Donor demographics
- Viral testing
- Product volume
- Full CBC panel

All products collected using strict IRB protocols at facilities under FDA/HTA guidelines

# Solutions for ALL of Your Immunological Research!

We offer same-day delivery within 200 miles of select locations with our global supply chain!
