

Template Standard ticket

Format: 140 x 55 mm

You can use this file as an extra layer in your layout program.
Do not forget to make our template invisible or to delete it before you save your final PDF, or JPG with high resolution.

Format size to be supplied (146 x 61 mm)

Finished format + 3 mm cutting margin (bleed)

It is advised to let the background and all of the images run through to this edge. This ensures that your printing can be cut neatly and this prevents a white edge round your print.

Finished size (140 x 55 mm)

Your printing will be cut on these dimensions. This format will be the final size and will be delivered to you.

Safe zone (4 mm)

Please make sure you keep your important images and text 4 mm clear of the cutting edge. This prevents a possible cut in the important parts, or that the images are so close to the edge that it results in a sloppy design.

Front-side

NOTE!

When printing tickets, you have the option of having a perforation, as well as the option of having two sets of numbers.

Numbering

When creating your artwork, please include a 10x30mm white box for the numbering to be placed in. Numbering should be the same on both the back and front sides of the ticket (if applicable).

The format of numbers will be as follows: 0001, 0002, 0003...etc.

Perforation

When ordering tickets with a perforation line, please supply an extra page/side of your artwork with a line in the position where the perforation is required. This line should be in 100% magenta colour.

Please make sure you keep your important images and text 4 mm clear of the cutting edge. This prevents a possible cut in the important parts, or that the images are so close to the edge that it results in a sloppy design.
