

EXCLUSIVE FINISHING MANUAL.

Exclusive finishing allows part of your product to have a special finish. This creates a very cool effect! The area where you want this exclusive finishing will have to be provided to us in 100% black in a separate page or document.

Result:

The diamond and text have a cool glossy effect.

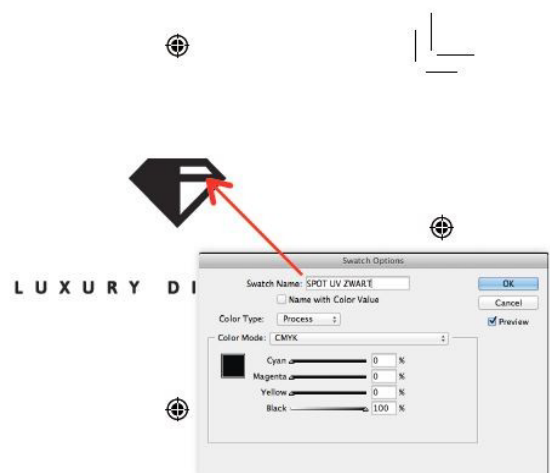

Page 1: Your design.

This is the page which shows your design without any extra finishes. In the example we've chosen an image of a diamond with text which will be finished with Spot UV. This works the same for all the foil finishings.

Page 2: Exclusive finishing page with 100% black.

On the second page you'll show what has to be printed in the exclusive finishing by making this black. **Tip:** You can also have more areas printed with exclusive finishing apart from what's seen in your design on page 1.

Do you want exclusive finishing on both sides of your printed product?

No problem! We can easily have both sides printed with your exclusive finishing.

How? For each side that you would like to print with exclusive finishing, you can create an extra page which shows the areas that you want in the exclusive finishing. Save all page in one multiple-paged PDF file and upload this to your order.
