
Template
Beachflag large

Size: 900 x 4300 mm

You can use this file as an extra layer in your layout programme.
Do not forget to make our template invisible or to delete it before you save your final PDF, or JPG with high a resolution.

Format size to be submitted (931 x 4319 mm)
Finished size + 5 mm cutting margin (bleed)
It is advised to let the background and all of the images run through to this edge. This ensures that your printing can be cut needly and this prevents a white edge around your print.

Finished size (921 x 4309 mm)
Your printing will be cut on these dimensions. This format will be the final size and will be delivered to you.

Safe zone (5 mm)
Please make sure you keep your important images and text 5 mm clear of the cutting edges. This prevents a possible cut in the important parts, or that the images are so close to the edge that it results in a sloppy design.
NOTE: **When finishing your flag, we need 50 mm on the right and bottom side for the hem. Make sure the background of your design continues all the way to the edge whilst your important photos or text stay at least 50 mm clear of the edges.**
