Explanation

Example: Size: 60 x 30 mm

The diagram on the left shows a card layout with the following dimensions:
- 64 mm (outer width) / 34 mm
- 60 mm (inner width) / 30 mm
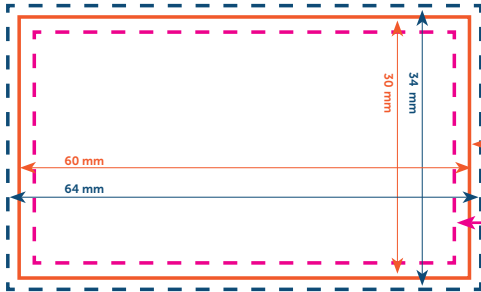

Example; Size to be submitted **(64 x 34 mm)**
(Your selected WIDTH and HEIGHT in millimeters + 3mm on all edges)
Finished size + 3 mm cutting margin (bleed)
It is advised to let the background and all of the images run through to this edge. This ensures that your printing can be cut needly and this prevents a white edge around your print.

Example; Finished size: **(60 x 30 mm)**
(Your selected WIDTH and HEIGHT in millimeters)
Your printing will be cut on these dimensions. This format will be the final size and will be delivered to you.

Safety zone (4 mm)
Please make sure you keep your important images and text 4 mm clear of the cutting edges. This prevents a possible cut in the important parts, or that the images are so close to the edge that it results in a sloppy design.

You can use this file as an extra layer in your layout programme.
Do not forget to make our template invisible or to delete it before you save your final PDF, or JPG with a high resolution.
