# Make your artwork print-ready

To smoothly transition from the design stage to printing, we have a simple guideline to help you!

1 Set up your file

We recommend using our templates, but you can also set up your document size according to the **format** you have chosen and adding **3 mm bleed**. As for the quality, **300 dpi resolution** is the standard to ensure crisp and clear prints.

3 mm

Bleed
This area will be trimmed. Ensure all background graphics or images cover this area.

Trim Line
This is the final size your artwork will be trimmed to.

4 mm

Safety Margin
Avoid placing text or important details within this area in case of trimming inaccuracies.

2 Neon Paper

If you choose for a neon poster, please note that **your design is printed only in 100% black ink on the neon colour of your choice**.

3 Extra checks

There are some checks to take into consideration before exporting your artwork:

- All fonts and objects must be embedded.
- Check your layers for **overprint**.

4 Export to PDF

Export your artwork to PDF format and make sure your document **colour mode** is CMYK.
