of the model. The model is based on the following assumptions:

1. The population is homogeneous in terms of genetic background and environmental conditions.
2. The population is large enough to ignore genetic drift.
3. The population is in Hardy-Weinberg equilibrium.
4. The population is in a steady state.

The model is based on the following assumptions:

1. The population is homogeneous in terms of genetic background and environmental conditions.
2. The population is large enough to ignore genetic drift.
3. The population is in Hardy-Weinberg equilibrium.
4. The population is in a steady state.

The model is based on the following assumptions:

1. The population is homogeneous in terms of genetic background and environmental conditions.
2. The population is large enough to ignore genetic drift.
3. The population is in Hardy-Weinberg equilibrium.
4. The population is in a steady state.

The model is based on the following assumptions:

1. The population is homogeneous in terms of genetic background and environmental conditions.
2. The population is large enough to ignore genetic drift.
3. The population is in Hardy-Weinberg equilibrium.
4. The population is in a steady state.

The model is based on the following assumptions:
