Explanation Fabric per square metre

Example: Size: 1000 x 500 mm

At Helloprint, we offer fabric in every size imaginable. For this reason, we are unable to give you a custom template for your design. However, we've put together these tips that you should keep in mind when designing your custom sized fabric:

Example; Size to be submitted (1010 x 510 mm)
(Your selected WIDTH and HEIGHT in millimeters + 5mm on all edges)

Finished size + 5 mm cutting margin (bleed)

It is advised to let the background and all of the images run through to this edge. This ensures that your printing can be cut neatly and this prevents a white edge around your print.

Example; Finished size: (1000 x 500 mm)
(Your selected WIDTH and HEIGHT in millimeters)

Your printing will be cut on these dimensions. This format will be the final size and will be delivered to you.

Safety zone (10mm)

Please make sure you keep your important images and text 10 mm clear of the cutting edges. This prevents a possible cut in the important parts, or that the images are so close to the edge that it results in a sloppy design.
