

Sabre® Direct Connect AvailabilitySM & Direct Connect Sell

Sabre Direct Connect Availability & Direct Connect Sell are the highest connectivity levels for car suppliers to the Sabre system.

Sabre Direct Connect Availability connectivity enables travel consultants to compare rates and availability directly from the car company's in-house reservation systems and to receive descriptions of rate rules by product.

Sabre Direct Connect Sell is an interactive connectivity level that enables travel consultants to sell, modify and cancel car bookings. This feature also provides an automatic response to reservation messages, the car supplier returning the confirmation number prior to ending the transaction.

Sabre Travel Network was the first to launch **Car Total Pricing**, which allows the traveler to know the total cost of the car rental, including all mandatory insurance, surcharges and taxes. Europcar proudly supports this feature.

Europcar Information and Help Pages

For detailed information about Europcar and the products offered, we invite you to visit the Europcar **DRS Pages** on <http://eservices.sabre.com>

- Europcar Location Listing (e.g. Hamburg) → CQLEPHAM
