Pipeline & Heating Solutions

# VALVE & ACTUATION SERVICE OFFER

- Order BOSS™ actuated packages by 4pm for next day delivery
- Bespoke actuated packages made to order
- Extensive range of products and accessories available
- Safety valve setting to customer requirements
- Technical product application advice and expertise available

**Pegler & Louden**

Pipeline & Heating Solutions

# Why BSS are... good to know!

- Place your order by 4pm and it will be available for delivery or collection from 7am\*
- Over 60,000 parts from hundreds of leading manufacturers - available when you need them
- The largest range of valves in the UK including over 13,000 BOSS™ products
- Any shape, any size, we have over 2,000 miles of tube in stock ready for you to order
- With over 60 branches nationwide we are always local to you
- National network of tool hire branches for all your tool hire needs

Exclusively from BSS, backed with our full technical support

We'll get the right tool delivered to you

BSS offer over **60,000 product lines** giving all our customers access to a wide range of equipment for all types of industry sectors and applications.

This brochure is designed to give the user a comprehensive guide to our BOSS™ range of valves, actuators, actuated packages & accessories.

In BSS, our world class BOSS™ range is backed with full technical and application support and complements the extensive ranges available from leading partner suppliers.

Our network is backed by a 140,000 sq. ft. national distribution centre, a specialist tube distribution centre and over 60 branches nationwide. With a fast and friendly service, BSS can offer access to an unrivalled range of products - available same day or next day - delivered to site or collected from our trade counters.

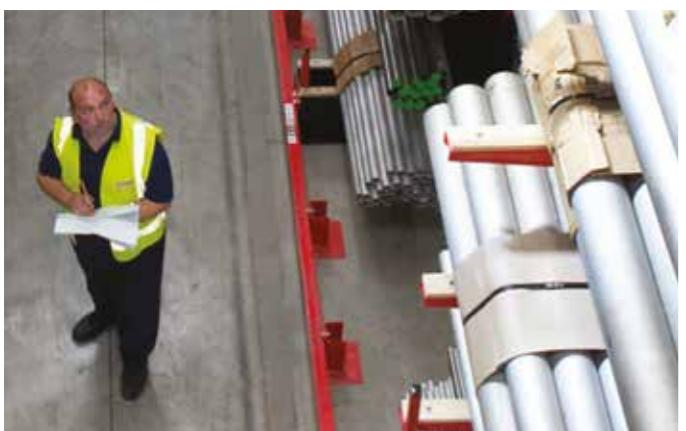

Every BSS branch now offers our Hire-It service - built around the needs of the plumbing and heating trade. You can be sure of a huge choice of well maintained, top name equipment that meets all the safety standards as well as expert advice and excellent service to accompany each and every hire.

Our in-house Engineering & Actuation team can provide actuated valve packages, pre-set safety valves, heat exchangers, bespoke flange modifications and more. With a fast and friendly service, BSS can also offer application advice, product sizing, commissioning and a range of bespoke engineering solutions.

The BOSS™ valve range maintains the highest standards of quality and reliability with products manufactured in accordance with industry recognised standards and approvals (including EN331 Fire Safe & WRAS where stated). This ensures commitment of product quality can be passed on to the customer. The latest additions to this best-selling range include:

- Pressure Independent Control Valves
- Differential Pressure Control Valves
- Modular Valve Systems
- Stainless Steel Ball Valves
- Pneumatic & Electric Actuators
- Actuated Valve Packages

To find out more about our latest special offers or to get a quote for your next job, just call your nearest branch on 0330 123 3521.

BOSS™ delivers heating, plumbing and pipeline system products for professionals who demand guaranteed quality and service.

The brand is built on a proud 100-year history and a solid reputation. We want our customers to recognise us as PROUD, DECISIVE, RESPECTED, CONFIDENT and EXPERT and we want to be an aspirational choice for the professionals in our industry.

We work hard to meet and exceed our customers' expectations every time they buy from us. We value the relationships we build and know that each and every one of them is based on trust. Our business has a long and proud history - dating back over a century - and we see an equally positive future.

Any tradesperson, whether they're a domestic installer or an industrial contractor, wants to use reliable products they know are up to the job. With our wide range and reputation for quality, BOSS™ appeals to every type of customer.

BOSS™ is a premium product offered alongside other market leading brands.

### What is Stress Corrosion Cracking (SCC)?

When subjected to the combined effects of stress and corrosion, many alloys can develop cracks over a period of time and specifically copper-zinc alloys such as brass can be sensitive to stress corrosion attack, particularly in the presence of moisture through condensation.

However, SCC occurs only in the presence of a sufficiently high tensile stress and a specific corrosive environment. For brasses, the environment involved is usually one containing ammonia or closely related substances such as amines. The presence of ammonia or related substances could typically arise from the insulation material or from various sources of chemicals used on an installation and may even be airborne.

Since all brasses are susceptible to stress corrosion cracking it is important to avoid the combination of high stress and unfavourable environment that may cause stress corrosion.

Stress corrosion cracking of joints can occur with quite low concentrations of ammonia and may be accompanied by black staining of the surrounding surface. SCC is usually localised with the cracks running roughly perpendicular to the direction of the tensile.

### Condensation and Insulation

Condensation of water vapour will occur on a surface that is at a temperature below the atmospheric dew point temperature due to the water vapour being drawn towards the cold surface as a result of a difference in partial vapour pressure between the air at ambient temperature and that at the temperature of the cold surface. Without adequate vapour sealing, moisture can be deposited through condensation within the insulating material and on the insulated metal surface.

Precautions must be taken to exclude moisture (condensation) from the system, therefore an effective vapour barrier is required. The purpose of the vapour barrier is to reduce, and if possible to prevent, the ingress of water vapour into the insulating material and it must be applied before the water in the pipe is cooled. Any joints in the insulating material must be fully sealed to ensure vapour permeance maintained continuously. Particular care must be taken at termination points to ensure that the integrity of the insulation and vapour barrier is maintained.

Only dry insulation material should be used and it should be kept dry until after the vapour barrier has been applied. Unsealed joints, badly fitting insulation and inadequate vapour sealing of termination points such as valve headworks and stems and test points can provide an easy passage for water vapour and subsequent condensation. Pipe supports should not be attached directly to the pipe because it is difficult to seal the insulation surface where the support projects through, therefore the pipe support brackets should be clamped over the exterior of the insulation where possible.

### Systems

Copper alloy valves and fittings are widely used throughout HVAC systems on hot water heating, chilled water and domestic hot and cold water. It is reasonable to assume that fitting practices are the same throughout all the systems but failure due to stress corrosion cracking (SCC) is almost invariably encountered with brass products in chilled water systems. Nickel plating of products does not provide protection against SCC.

Products manufactured in bronze are not susceptible to SCC and DZR brass products are also less susceptible.

### Installation

Joints must be made in accordance with our installation instructions. Correctly fitting tools such as spanners must be used to avoid causing damage and localised stressing to the component. 'Stilson' type wrenches must not be used. Excessive use of jointing material combined with high tightening forces can generate high hoop stresses in female threaded components.

Where failure does occur as a result of SCC, the stresses involved will almost always have been generated during installation.

### Reduce the Risk of SCC

- Preferably install products manufactured in bronze or DZR brass material. If DZR brass is installed, the use of compression ended components is not recommended.
- Ensure that ball valves are supplied with extensions.
- All insulation and vapour barriers must comply with BS5970:2001 and BS5422:2009.

kg	0.22	0.33	0.44

#### Bronze Gland Cock 81HU

Screwed BSPT Male, Bronze body, Brass gland & cap  
Maximum pressure 10 bar @ 120°C  
Suitable for water or oil

Size	½	¾	1
Code	20016649	20016660	20016671
F-F mm	96	129	157
kg	0.38	0.67	1.20

#### Bronze Drain Tap 371LS Lockshield BS 2879-2

Screwed BSPT Male, Bronze body, Brass cap, stem and disc holder  
Maximum pressure 10 bar @ 110°C  
Rubber disc and "O" rings

Size	½	¾	1
Code	22066133	22066144	22066155
F-F mm	54	75	82
kg	0.22	0.33	0.44

#### DZR Brass Drain Tap 372 Extended

Extended Capillary Male End, DZR Brass body, Brass spindle & gland nut, Rubber NBR washer & "O" ring  
Maximum pressure 16 bar @ 30°C, 10 bar @ 65°C, 6 bar @ 85°C  
WRAS approved

Size	15
Code	27200107
F-F mm	77
kg	0.12

#### Brass Draw Off Ball Valve - FIG 22S

Screwed BSPT Male, Brass body, Brass Chrome Plated ball, Buna-N Seat  
Maximum pressure 7 bar @ 100°C  
Cap can be used to operate valve

Size	½
Code	22083501
F-F mm	76
kg	0.19

#### Manual Radiator Valves - Chrome Plated Straight Lock Shield Valve Concealed Adjustment

Dual 15mm x 1/2" connection. Chrome Plated finish. Matching lock shield. TRV design  
Maximum pressure 10 bar @ 65°C. Maximum temperature 5 bar @ 120°C

<b>Size</b>	<b>15</b>
<b>Code</b>	49341037
<b>F-F mm</b>	105
<b>kg</b>	0.28

#### Thermostatic Radiator Valve - Horizontal TRV

TRV has a liquid filled head which can be mounted on the flow or return. Built-in tamper proof key  
Control range of 11°C to 29°C. Frost setting to open automatically around 7°C to prevent system freezing  
Positive shut off allows the heat emitter to be isolated for maintenance  
Built in tamper proof key operated setting

<b>Size</b>	<b>15</b>
<b>Code</b>	49341048
<b>F-F mm</b>	53
<b>kg</b>	0.40

#### Thermostatic Radiator Valve - Vertical TRV

TRV has a liquid filled head which can be mounted on the flow or return. Built-in tamper proof key  
Control range of 11°C to 29°C. Frost setting to open automatically around 7°C to prevent system freezing

<b>Size</b>	<b>15</b>
<b>Code</b>	49341059
<b>F-F mm</b>	53
<b>kg</b>	0.40

#### Thermal Head Options - 0 Position

Tamper proof key, lift and lock operation prevents accidental adjustment  
Control range of 11°C to 29°C. Frost setting to open automatically around 7°C to prevent system freezing  
Positive shut off allows the heat emitter to be isolated for maintenance

<b>Code</b>	49341070
<b>F-F mm</b>	84
<b>kg</b>	0.15

#### Thermal Head Options - 2M or 8M Remote Sensor

2metre or 8metre remote sensor.  
Remote sensing prevents curtains or office equipment interfering with a thermal head. Suitable for LST radiators

<b>Size</b>	<b>2m</b>	<b>8m</b>
<b>Code</b>	49341081	49341229

## Actuators and Ancillaries

Pneumatic Actuators, Electric Actuators, Test Points, Solenoid Valves, Sight Flow Indicators and Switchboxes

### Accessories - Switchbox

Namur Switchbox complete with 2 x SPDT Silver Plated Switches  
To suit 20, 30, 40 & 50 namur pinion

Code 68520407

### Accessories - Solenoids

Solenoid valve for 1/4 turn pneumatic actuators  
Namur standard fixing dimensions, Aluminium body, 1/4" BSP port connection  
Max ambient temperature +80°C, Min working temperature -20°C, 3 to 10 bar working pressure

Size	24V	110V	240V
Code	69631097	69631116	69631127

### Accessories - Silencer

1/4" sintered Bronze silencer with BSP thread

Size	1/4"
Code	69631193

## Actuators and Ancillaries

Pneumatic Actuators, Electric Actuators, Test Points, Solenoid Valves, Sight Flow Indicators and Switchboxes

### High Voltage - BOSS™ EA218

110-240V AC/DC multi voltage On/Off Actuator, IP67 rated, set at 90°  
LED status feedback, Manual override, Over torque and anti-condensation protection, all external electrical connection, ISO 5211 mounting  
Temperature range -20°C to +70°C  
6 models offering a range of break away torques from 25 to 350Nm  
Conversion kits available for: Failsafe (close or open), Modulating (0-10V or 4-20mA) or Failsafe Modulating

Size	Model 20	Model 35	Model 55	Model 85	Model 140	Model 300
Code	21800077	21800088	21800099	21800107	21800118	21800129
Length	181	181	181	181	235	235
kg	1.80	1.90	2.40	3.00	5.20	5.20

### Low Voltage - BOSS™ EA218

12-24V AC/DC (Models 140 & 300 24V AC/DC only) multi voltage On/Off Actuator, IP67 rated, set at 90°  
LED status feedback, Manual override, Over torque and anti-condensation protection, all external electrical connection, ISO 5211 mounting  
Temperature range -20°C to +70°C  
6 models offering a range of break away torques from 25 to 350Nm  
Conversion kits available for: Failsafe (close or open), Modulating (0-10V or 4-20mA) or Failsafe Modulating

Size	Model 20	Model 35	Model 55	Model 85	Model 140	Model 300
Code	21800011	21800022	21800033	21800044	21800055	21800066
Length	181	181	181	181	235	235
kg	1.80	1.90	2.40	3.00	5.20	5.20

### Failsafe System - For BOSS™ EA218

Drives the actuator to a pre-determined position in the event of external power loss  
Complete, simple to install plug and play failsafe kit with on site retro fit capability  
Suits high and low voltage EA218 actuators

Size	BSR 20-85	BSR 140-300
Code	21800140	21800162
kg	0.20	0.40

## Actuators and Ancillaries

Pneumatic Actuators, Electric Actuators, Test Points, Solenoid Valves, Sight Flow Indicators and Switchboxes

### Modulating System - For BOSS™ EA218

Digital Positioning System to convert on/off to modulating function (0-10V or 4-20mA input and output)  
Complete, simple to install plug and play, self calibrating modulating kit with on site retro fit capability  
Suits high and low voltage EA218 actuators

Size	DPS 20-85	DPS 140-300
Code	21800151	21800173
kg	0.50	0.90

### Failsafe Modulating System - For BOSS™ EA218

Failsafe modulating function achieved by the installation of both the BOSS Failsafe and Modulating System  
Actuator fails to pre-determined position on loss of external power  
Complete, simple to install plug and play kits with on site retro fit capability  
Suits high and low voltage EA218 actuators

Size	BSR & DPS 20-85	BSR & DPS 140-300
Code	21800140 & 21800151	21800162 & 21800173
kg	0.70	1.30

## Actuators and Ancillaries

Pneumatic Actuators, Electric Actuators, Test Points, Solenoid Valves, Sight Flow Indicators and Switchboxes

### Test Plugs - Extended

Screwed BSPT Male, Brass body, cap and retaining ring, Ethylene Propylene Retaining strap and core  
Maximum pressure 35 bar @ -8 to 135°C  
Suitable for low temperature hot water, chilled water and low temperature steam  
Extended plugs give approximately an extra 38mm for insulation

Size	<b>8mm</b>	<b>15mm</b>
Code	25028626	25028637

**Decimal Multiples and Sub-Multiples**

Although the SI units are preferred it will not be practical for everyday use to limit usage to these and therefore their decimal multiples and sub-multiples will also be used. These are formed by using the following prefixes:

Factor by which the unit is multiplied	Prefix	Symbol
10¹²	ter	T
10⁹	giga	G
10⁶	mega	M
10³	kilo	k
10²	hecto	h
10	deca	da
10⁻¹	deci	d
10⁻²	centi	c
10⁻³	milli	m
10⁻⁶	micro	μ
10⁻⁹	nano	n
10⁻¹²	pico	p
10⁻¹⁵	femto	f
10⁻¹⁸	atto	a

**Conversions to SI Units****Pressure Standards**

International standard atmosphere	(1 atm)	= 1.0133 bar = 1.0332 kgf/cm² = 14.6959 lbf/in²
Metric atmosphere	(1 at)	= 0.9807 bar = 1 kgf/cm² = 14.2233 lbf/in²
	ata	= at absolutew
	atu	= at gauge

Standard conditions – s.t.p. or NTP = 1.0133 bar 0°C = 14.6959 lbf/in² at 0°C

**Density**

## Technical Information

### Materials Selection Chart

Section	Material	Typical Applications	Size Range	Pressure Rating	Temperature Rating	Jointing Technique	Key Product Features
Industrial	PVC-U	Acids and Alkalies; Effluents; Potable Water; Chemical Processing	12 to 315mm (Metric) ¾" to 12" (Imperial)	Metric: PN16 20 to 63mm pipe; PN16 12 to 160mm; PN10 20 to 315mm; Imperial: ½" to 6" pipe Class E; ¾" to 12" fittings Class E	5°C to 60°C	Solvent weld	Lightweight; Easy to install; Corrosion resistant
	ABS	Chilled Water; Air Conditioning; Boosted Cold Water; Vacuum Systems; Waste Water; De-Mineralised Water	16 to 315mm (Metric) ¾" to 12" (Imperial)	Metric: PN10 16 to 250mm; PN8 315mm Imperial: Up to 4" Class E; Up to 8" Class C; 10" and 12" Class B	-40°C to 70°C	Two step solvent weld	Lightweight; Easy to install; Wide temperature range; Tough and durable; Corrosion resistant
	PVC-C	Acids and Alkalies; Deminerlaised Water; Industrial Waste Treatments; Chemical Processing; Soaps Paper & Pulp; Effluents	16 to 160mm	PN16 16mm to 110mm PN10 160mm	5°C to 95°C	Solvent weld	Excellent chemical resistance; Lightweight; Wide temperature range; Easy to install; High temperature acids and alkalis
	Polypropylene	Acids and Alkalies; Chemical Processing; Industrial Waste Treatments; Pharmaceuticals; Effluents	20 to 100mm ½" to 4"	Metric: PN10; Imperial: ¾" to ¾" Class E; 1" to 2" Class D; 3" to 4" Class C	0°C to 100°C	Fusion welded using socket butt	Lightweight; Excellent chemical resistance; Multiple jointing options
	PVDF	Pharmaceutical grade purified water (PW) and DI water, using hot water, steam chemical or ozone sanitisation. Chemical process industry microelectronics life science	16 to 315mm	16 to 225mm PN16. 90 to 315mm PN10	-20°C to +140°C	Fusion welded using socket &/or butt	Outstanding mechanical properties, even at high temperatures. Long service life, even under intensely corrosive conditions. Very pure material. Secure jointing. Smooth inner surface
Building Services	BOSS PVC-C	Domestic Hot & Cold Water	16 to 225mm	PN10 75 to 225mm; PN16 16 to 160mm	0°C to 80°C	Solvent Weld	Excellent chemical resistance; Lightweight; Wide temperature range; Easy to install; High temperature acids and alkalis
	Aquasystem	Hot and cold water supply, Heating systems, Chilled, Compressed air lines.	20 to 125mm		0°C to 80°C	Electrofusion, socket fusion	Lightweight; Limescale and corrosion free; Fully WRAS approved
	Friatherm	Hospitals; Schools; Commercial Buildings; Hotels; Sports Stadiums; Residential Buildings	16 to 160mm	PN25 Up to 63mm; PN16 75mm and 160mm	0°C to 95°C	One step solvent weld	Lightweight; Limescale and corrosion free; Minimum 50 years service life; No power or hot works required; Fully WRAS approved
	Geberit Mepla	Hot and cold water supply (mains and risers) Industrial applications Fire sprinkler systems Air supply	16 to 63mm	10 Bar operating pressure. 16 Bar test pressure	0°C to 95°C	Crimp compression	Lightweight High stability High temperature resistance Expansion resistance Hygienic Corrosion resistant
	Polypress	Potable water, Hot and cold plumbing and heating systems	16 to 63mm	10 bar	0°C to 95°C	Crimp compression	Lightweight Optimum Flow characteristics High temperature resistance Expansion resistance Corrosion resistant
	John Guest	Potable water, Hot and cold plumbing and heating systems	10 to 28mm	12 Bar	0°C to 105°C	Twist & lock fittings, Pushfit connection	Demountable, lightweight, flexible, corrosion free.

Section	Material	Typical Applications	Size Range	Pressure Rating	Temperature Rating	Jointing Technique	Key Product Features
Drainage	Soil & Waste	Above and below ground: residential (Apartments), industrial, commercial drainage	32 to 160mm	N/A	N/A	Solvent weld range and ring seal push fit	Integrated soil, waste and trap system.
	HDPE - Geberit	Above and below ground: residential (Apartments), industrial, commercial drainage	32 to 315mm	N/A	N/A	Butt weld or Electro weld fittings	Lightweight, chemical, abrasion and impact resistant.
	HDPE - Terrain	Above and below ground: residential (Apartments), industrial, commercial drainage	40 to 315mm	N/A	N/A	Electrofusion, mechanical coupling and butt welding	Lightweight, chemical, abrasion and impact resistant.
	Acoustic Drainage - Geberit db20	Acoustic drainage requirements for Multiple dwellings, Libraries, Public buildings, Restaurants, Cinemas, Hospitals, Hotels and Offices	56 to 160mm	N/A	N/A	Butt weld or Electro weld fittings	Acoustic drainage
	Acoustic Drainage - Terrain db12	Acoustic drainage requirements for Multiple dwellings, Libraries, Public buildings, Restaurants, Cinemas, Hospitals, Hotels and Offices	40 to 160mm	N/A	N/A	Push Fit	Acoustic drainage
	Acoustic Drainage - Friaphon	Acoustic drainage requirements for Multiple dwellings, Libraries, Public buildings, Restaurants, Cinemas, Hospitals, Hotels and Offices	110to 160mm	N/A	N/A	Push Fit	Superb sound insulation; Lower cost alternative to cast iron; No lagging required; Lower cost alternative to lagged plastic; Push fit assembly; High impact and temperature resistant
	Vulcathene	Laboratories in: Schools; Universities and Colleges; Hospitals and Clinics; Pharmaceutical Companies; Research Organisations	38 to 152mm	N/A	-20°C to 100°C (only intermittent at 100°C)	Mechanical compression & endfusion techniques	Purpose designed for chemical drainage. Two easy jointing methods. Fully BBA approved
Utilities	Polyethylene	Gas and water utilities industrial water applications, cooling, irrigation, industrial effluents	20 to 1000mm	20 to 63mm 12.5 Bar 90 to 710mm 16 Bar 90 to 1000mm 10 Bar	0°C to 60°C	Butt fusion and Electro fusion fittings	Lightweight, chemical, abrasion and impact resistant.

When considering applications, pressure and temperature please refer to the manufacturers data for precise detail of operating details and product suitability as manufacturers material blends will differ and may affect the suitability.

<sup>1</sup> These flange thicknesses are also valid for ductile iron flanges type 21-2<sup>2</sup> Steel flanges in this DN and PN may be supplied with 8 holes. For compliance with these, equivalent cast iron flanges may be supplied with 8 holes as special order and after agreement between manufacturer and customer.

Flange thicknesses for copper alloy are from BS 450

<sup>3</sup> Copper alloy flanges are always flat-faced

# Pegler & Louden

**BSS** | Specialist in Industrial Valves

**PEGLER & LOUDEN HAS A REPUTATION AS ONE OF THE INDUSTRY'S LEADING SPECIALIST PROVIDERS OF VALVES AND FLOW CONTROL PRODUCTS.**

Our aim is to supply a high level of quality products and after-sales support using over 100 years of industrial sales experience. We take pride in working closely with our customers to provide the most suitable equipment for their process needs, offering on- or off-the-shelf packages. We provide a one-stop shop for all your needs.

Our service offer includes:

- Experienced technical support
- Complete solutions
- Single source supply
- Quality approved and traceable systems
- Valve and actuation assembly
- Certification
- Next day delivery from stock
- Test facilities
- Nationwide coverage

**Pegler & Louden Hotline**

Pipeline & Heating Solutions

# VALVE & ACTUATOR SERVICE

- Order BOSS™ actuated packages by 4pm for next day delivery
- Bespoke actuated packages made to order
- Extensive range of products and accessories available
- Safety valve setting to customer requirements
- Technical product application advice and expertise available

0330 123 3521
