## Submissions

Each submission needs to include the details on the previous page along with attachments to provide evidence of compliance to the relevant specifications, standards or drawings. These attachments may include:

- Technical Data Sheets (TDS)
- NATA-endorse test results
- Material Safety Data Sheets (MSDS)

## Evaluation

Products shall be evaluated against the relevant specifications and, if found conforming, listed in the *Product Index* on the condition that:

- Product (chemical) composition does not change
- Product dimensions do not change
- Performance is maintained

Should the product composition or design change, or the specification/drawing is updated, a new application submission will be required.

## Product Removal

Products may be removed from the *Product Index for Bridges and Other Structures* for the following reasons:

- Discontinuation of supply or availability
- Poor performance
- Non-compliance to reference specifications and standards

Suppliers will be notified of removal in writing.

## Product Index Management

To maintain the accuracy of this *Product Index*, suppliers shall notify Engineering and Technology of any changes to contact or product details.

## Certification of Application

I hereby certify that:

- a) the details contained within this application are true and correct
- b) I have read and understood the requirements regarding product assessment and listing
