

Duet™ Diffuser

The Duet Diffuser features intermittent run time settings, an automatic shutoff feature, and a Bluetooth speaker. All you need to do is choose your favorite pairing of music and essential oils. The Duet Diffuser will take care of the rest.

Item No.: 41354

From the moment you wake for the day to the last few minutes before you drift off to sleep at night, the Duet Diffuser will be there to elevate your sensory experience and add a touch of luxury to your life. The Duet Diffuser allows you to diffuse two different essential oils at once, blending them in the air and creating a subtle, nuanced pairing of essential oil scents that a single-pump diffuser can't create. The Duet Diffuser elevates the benefits of aromatherapy by utilizing water-free atomizing technology to separate essential oils into a vapor of millions of microparticles, dispersing them into the air without the need to ever refill a water reservoir.

With the Duet Diffuser, you can customize how much essential oil you'd like to use by setting customizable diffusion times, automatic shutoff, and flexible bottle size options in 5 ml, 10 ml, or 15 ml. To maximize one particular essential oil, you can connect two bottles of the same oil to both pumps.

The timelessly sleek and sophisticated design will add an air of opulence to any space, while the handle and portable waterless convenience make it easy to bring it with you wherever you go. With the built-in Bluetooth speaker, you can use the Duet Diffuser to create your just-right atmosphere as you take a bath, sit by the pool, or drift off to sleep.

This is a limited-time offer only. Create your scent symphony with the Duet Diffuser before it's gone!

FEATURES & BENEFITS

- Atomizing essential oil dispersion
- Intermittent run-time setting
- Automatic shutoff
- Dual-pump misting
- Bluetooth speaker with adjustable volume and previous/next buttons
- Portability

TOP 3 REASONS

1. Atomizing, water-free diffuser creates a higher concentration of essential oil dispersion without the mess
2. Dual-mist spouts connect to either 5 ml, 10 ml, or 15 ml oil bottles
3. Bluetooth speaker enhances the diffusing experience

Duet™ Diffuser

DIRECTIONS

1. Press down on the pump until it pops open. Gently pull to remove the pump. Note: The pumps come with no bottle attached.
2. When you've selected the oils you want to use, remove the outer cap, then use the enclosed drop reducer remover tool to remove the plastic drop reducer on the bottle.
3. Insert the appropriate length of tube into the bottom of the pump and screw it onto the desired oil bottle.
4. Insert your newly attached oil bottle and pump back into the diffuser, being sure to align the markings on the pump with the markings on the diffuser, then gently press down.
5. Connect to the power supply.
6. Press the power button to start the diffuser.

NOTE: Essential oils with a higher viscosity will diffuse differently. You may or may not see the mist depending on which oil is diffusing.

SUGGESTED USES

- Designed with dual-mist spouts that connect either a 5 ml, 10 ml, or 15 ml oil bottle, the Duet Diffuser lets you choose between diffusing a single or a combined aroma of your two favorite oils to create an atmosphere customized to your specific needs.
- You can customize and tailor your diffusing experience by choosing run times and pairing your favorite audio.
- The sleek and sophisticated design fits any style of interior, and the handle makes for easy portability.
