

A safer way to pay for your essentials

We are now enabling 3D Secure to
provide extra security for your enrollment
and Quick Order purchases.

3D Secure is a security protocol banks worldwide use to authenticate online transactions. It adds protection against unauthorized use of debit or credit cards when making payments online.

HOW DOES IT WORK?

3DS will prompt the purchasing member to enter a one-time password (OTP) to authenticate the transaction when making enrollment or Quick Order purchases online.

STEP 1:
Shop for your essentials in our Virtual Office then proceed to checkout.

STEP 2:
Choose Standard Delivery as your shipping method.

STEP 3:
Choose your preferred debit or credit card under the payment field.

STEP 4:
Click the Place Order button.

STEP 5:
3DS will prompt an OTP via SMS. Enter your OTP on the field provided.

STEP 6:
Continue your checkout process.
