

Glass Foaming Hand Soap Dispenser

FAQ

Q. What kind of plastics make up the Foaming Hand Soap Dispenser's pump and tube?

A. Our Glass Foaming Hand Soap Dispenser features a foaming pump composed of polypropylene (PP), polyethylene (PE), foam, and stainless steel.

Q. What are the dimensions of the Foaming Hand Soap Dispenser?

A. Our Foaming Hand Soap Dispenser measures 6.2 inches in height by 2.9 inches in diameter.

Q. Can I lock the Foaming Hand Soap Dispenser pump when it's not in use?

A. No, the Foaming Hand Soap Dispenser doesn't include a locking mechanism.

Q. How should I clean the Foaming Hand Soap Dispenser?

A. The pump can be cleaned and maintained by periodically purging the mechanism parts with warm water. Once cleaned, purge with air and allow the pump to dry inside and out. Then purge and test its performance with clean tap water. If the pump operates as expected, begin normal use with Young Living's foaming hand soaps or foaming hand soap concentrates.

Q. Is the Foaming Hand Soap Dispenser or any of its components dishwasher safe?

A. No, the bottle and its foaming pump should not be cleaned in the dishwasher. The bottle features fill line markings that could be removed in the dishwasher.

Q. Will the Foaming Hand Soap Dispenser become a permanent product, or is it only available for a limited time?

A. Our Foaming Hand Soap Dispenser is intended to become part of our product line as a permanent item.

Q. Is the Glass Foaming Hand Soap Dispenser frosted or transparent?

A. Our Foaming Hand Soap Dispenser is acid-etched, creating a frosted appearance.
