

Wipes Dispenser

FAQ

Q. What materials make up the Young Living Wipes Dispenser?

A. Our wipes dispenser is primarily made of ABS (acrylonitrile butadiene styrene). Several smaller parts are made of silicone, stainless steel, and iron for magnetic closure.

Q. What are the external dimensions of the wipes dispenser?

A. The external dimensions of the wipes dispenser are 9.5 inches in height by 3.23 inches in diameter.

Q. What are the internal dimensions of the wipes dispenser?

A. The internal dimensions of the wipes dispenser are 8 inches in height by 3 inches in diameter.

Q. What size of wipes should I use in the wipes dispenser?

A. Our wipes dispenser is optimally sized for use with our Thieves[®] Multipurpose Wipes (7 inches by 6 inches).

Q. Will the wipes dispenser become a permanent product or is it only available for a limited time?

A. Our wipes dispenser is intended to become a permanent part of our product line.

Q. What makes the wipes dispenser better than other options available on the market?

A. The wipes dispenser distinguishes itself through its sustainable, refillable design, significantly reducing environmental impact. Its compact and portable form, coupled with a superior airtight seal, ensures that wipes stay fresh longer and are easy to dispense one at a time. The canister also features a sleek, modern design that blends seamlessly into any setting, offering an environmentally friendly, functional, and aesthetically appealing product.

Q. How should I clean the wipes dispenser?

A. The wipes dispenser is made of ABS materials and soft-touch coatings, which are sensitive to harsh cleaners and essential oils. When cleaning the dispenser, we recommend either using undiluted rubbing alcohol and a microfiber cloth or using warm water and a very mild cleaner and rinsing immediately. You should not soak the dispenser in any type of cleaner.

Q. Can I wash the wipes dispenser in the dishwasher?

A. No, you should never wash the wipes dispenser in a dishwasher. Our new wipes dispenser features a soft-touch coating that cannot hold up against the steam and heat of a dishwasher.
