

## Crocodile Snowflake

Trim off these instructions to read as you fold.

1. Fold the paper EXACTLY along the dotted horizontal fold line.
2. Lay the paper flat on the table with the paper crocodile side down and the folded edge toward you.
3. Put your right pointer fingernail on the dashed line where it meets the folded paper edge.  
Then fold the bottom left corner up aligning the folded edge UP TO the dashed line, not over it.
4. Next bring the bottom right corner up and align the length of the fold to the left edge.
5. Last fold the paper in half again. Keep the point of the paper sharp and all layers aligned.

Now you are ready to cut out a float of crocodiles.
