Exotics!

Trophic “Cascade”

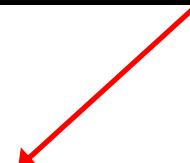

Ceratophyllum echinatum
Gratiola aurea
Littorella uniflora
Lobelia dortmanna
Potamogeton alpinus
Potamogeton vaseyi
Utricularia minor

Elatine minima
Isoetes lacustris
Myriophyllum farwellii
Potamogeton friesii
Potamogeton spirillus
Ruppia maritima
Utricularia vulgaris

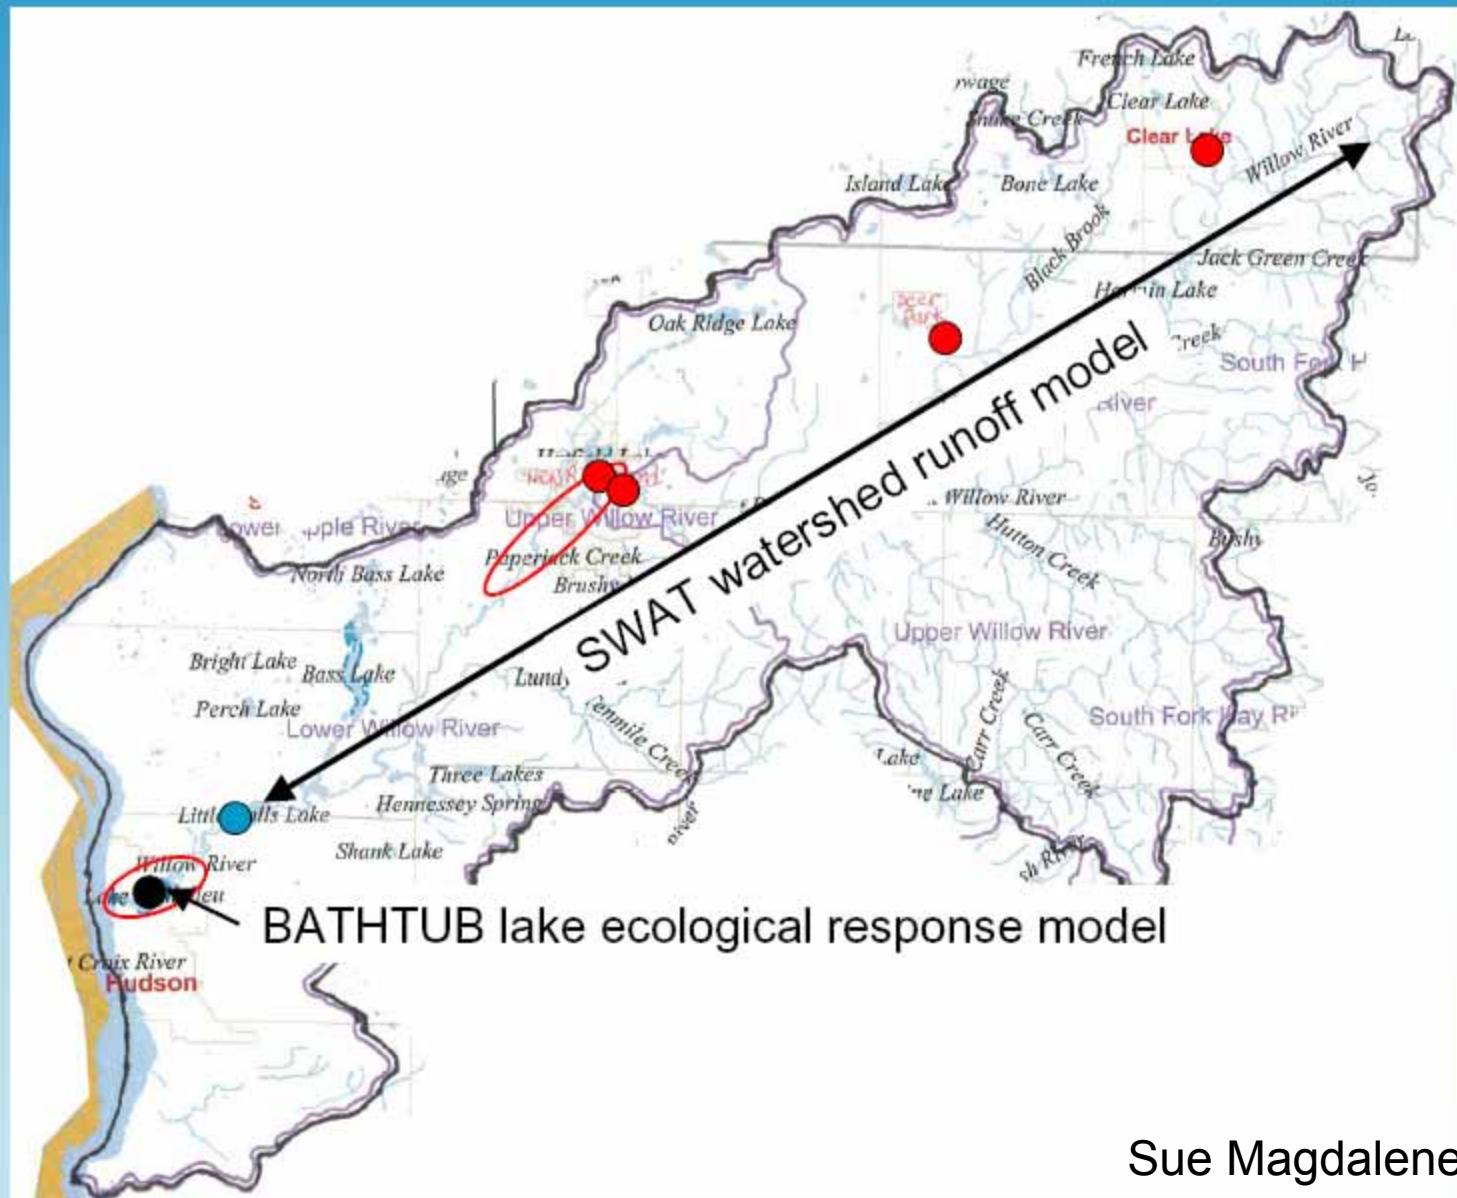

Brasenia schreberi
Chara sp.
Megalodonta beckii
Myriophyllum sibiricum
Najas flexilis
Potamogeton gramineus
Potamogeton robbinsii

Ceratophyllum demersum
Elodea canadensis
Myriophyllum spicatum
Potamogeton crispus
Nuphar variegata
Nymphaea ordata
Lemna minor

Heteranthera dubia
Myriophyllum heterophyllum
Potamogeton amplifolius
Potamogeton pusillus
Potamogeton zosteriformis
Ranunculus aquatilis
Sagittaria graminea

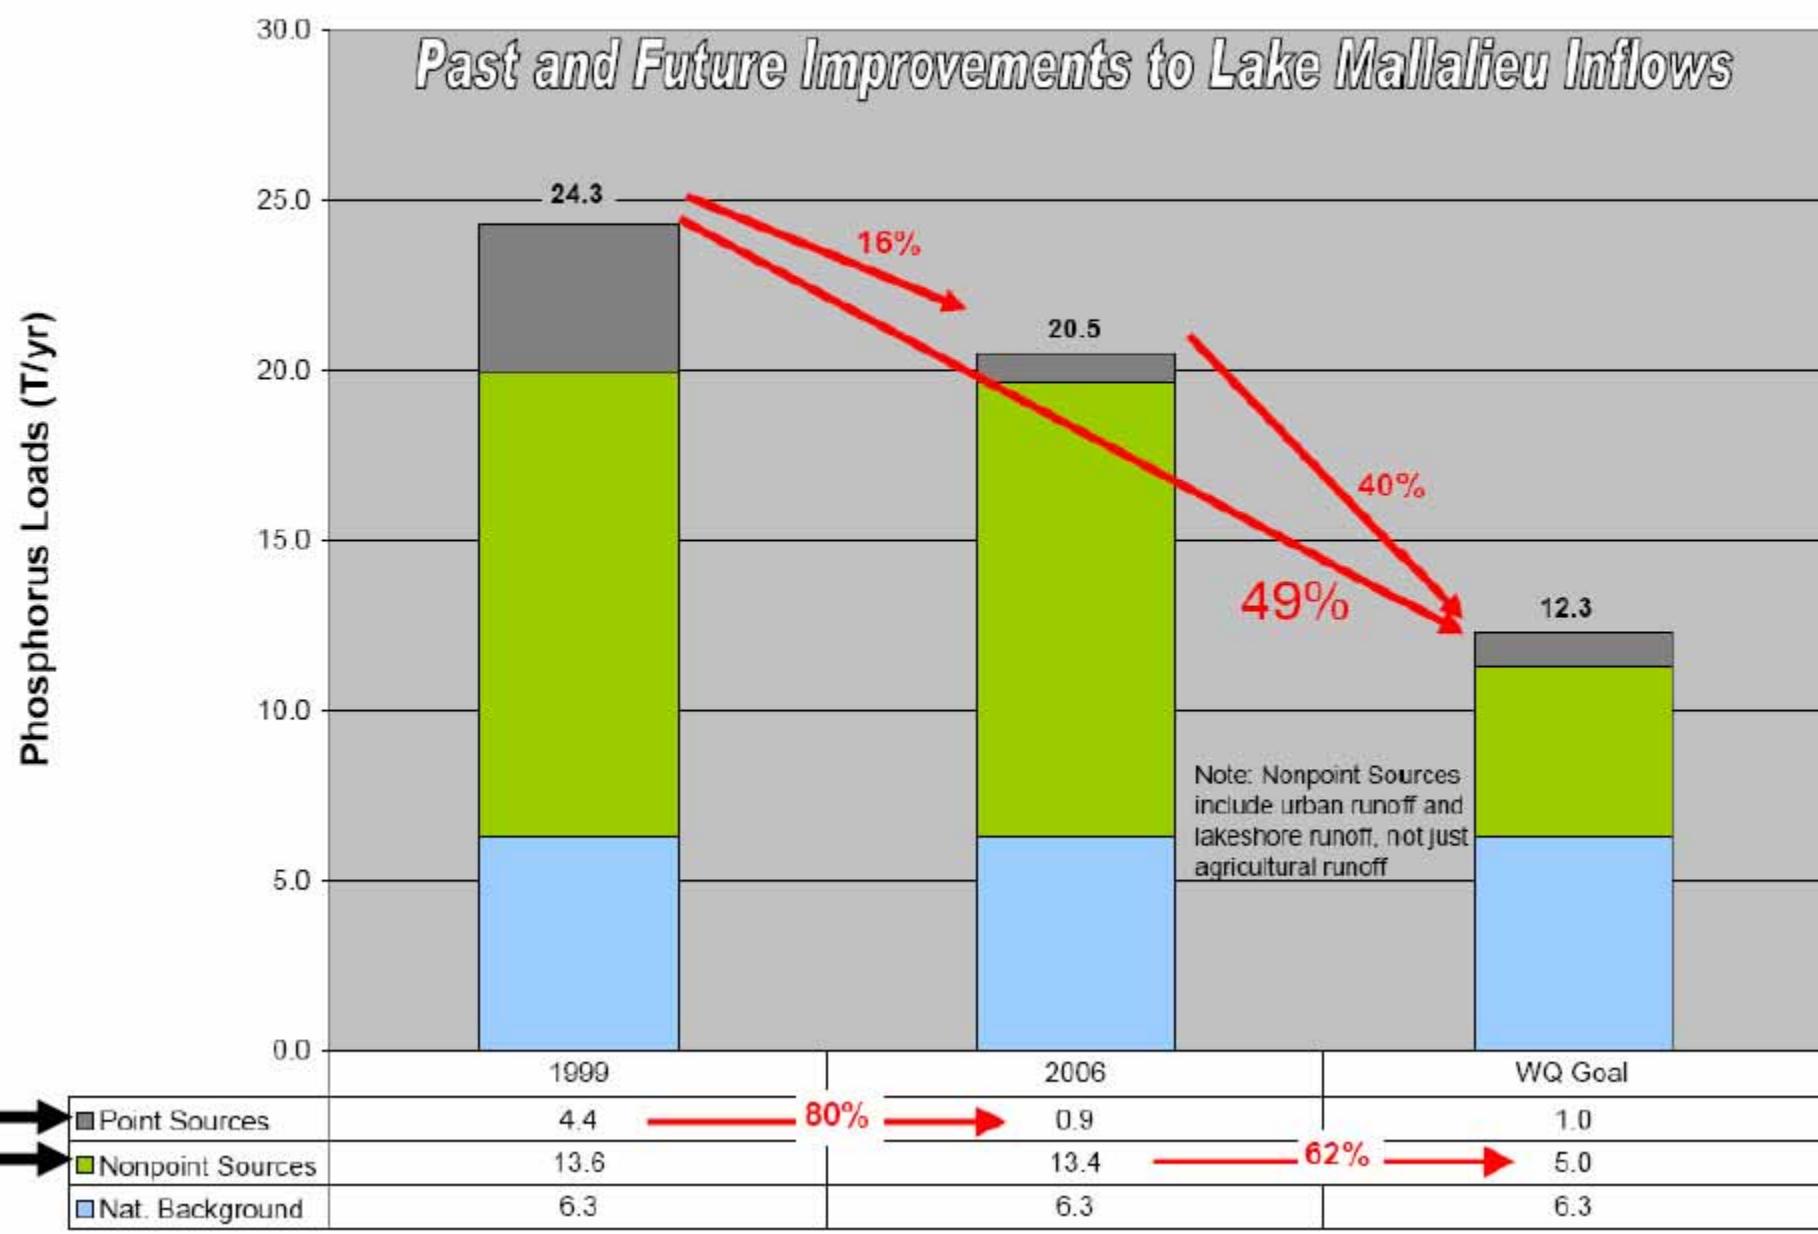

Willow River Watershed

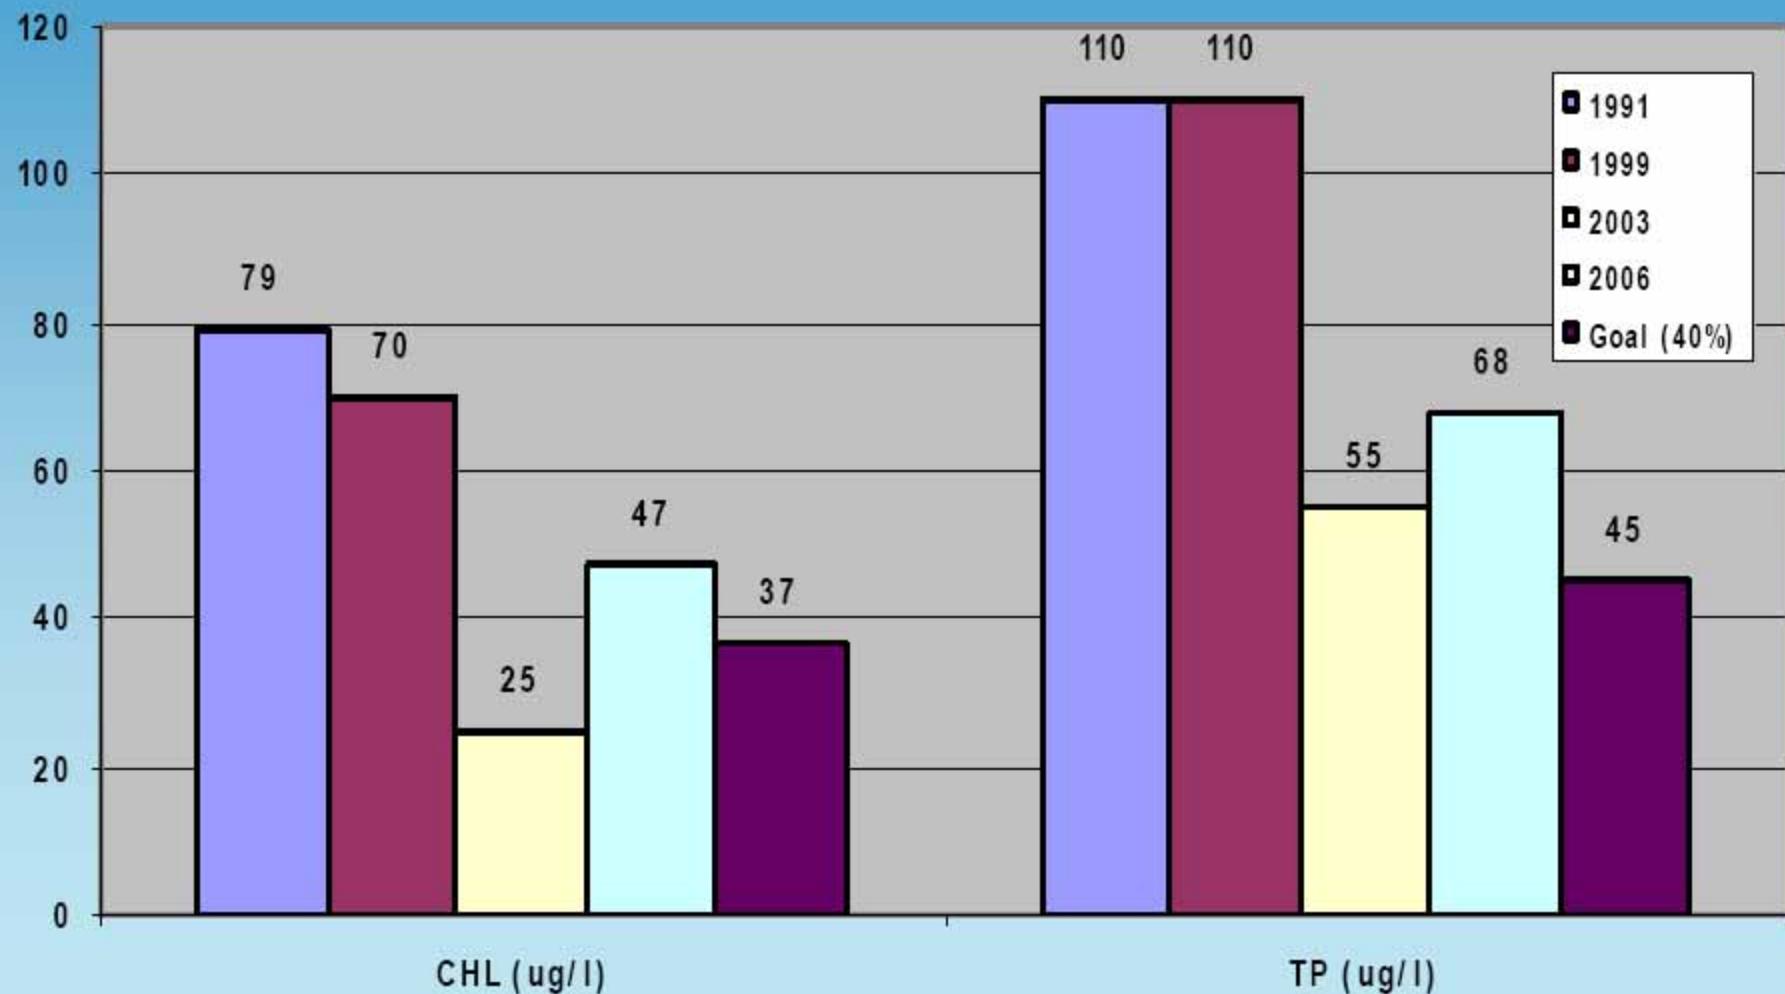

Sue Magdalene, SCWRS

Proposed Lake Mallalieu TMDL WQ Goal

Lake Mallalieu Water Quality

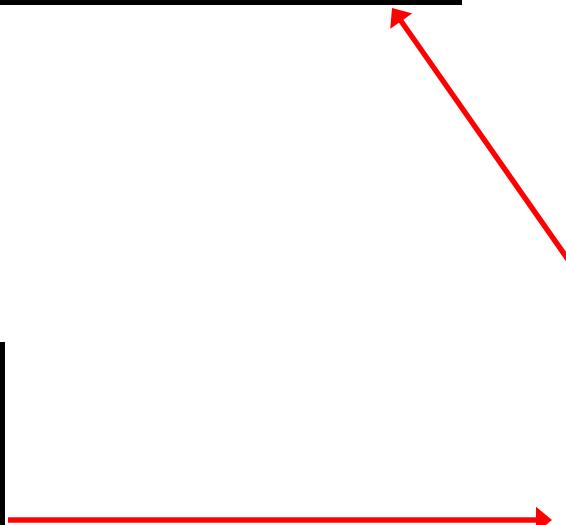

Comparison of Monitoring Results and Goal

Brasenia schreberi
Chara sp.
Megalodonta beckii
Myriophyllum sibiricum
Najas flexilis
Potamogeton gramineus
Potamogeton robbinsii

Ceratophyllum demersum
Elodea canadensis
Myriophyllum spicatum
Potamogeton crispus
Nuphar variegatum
Nymphaea ordata
Lemna minor

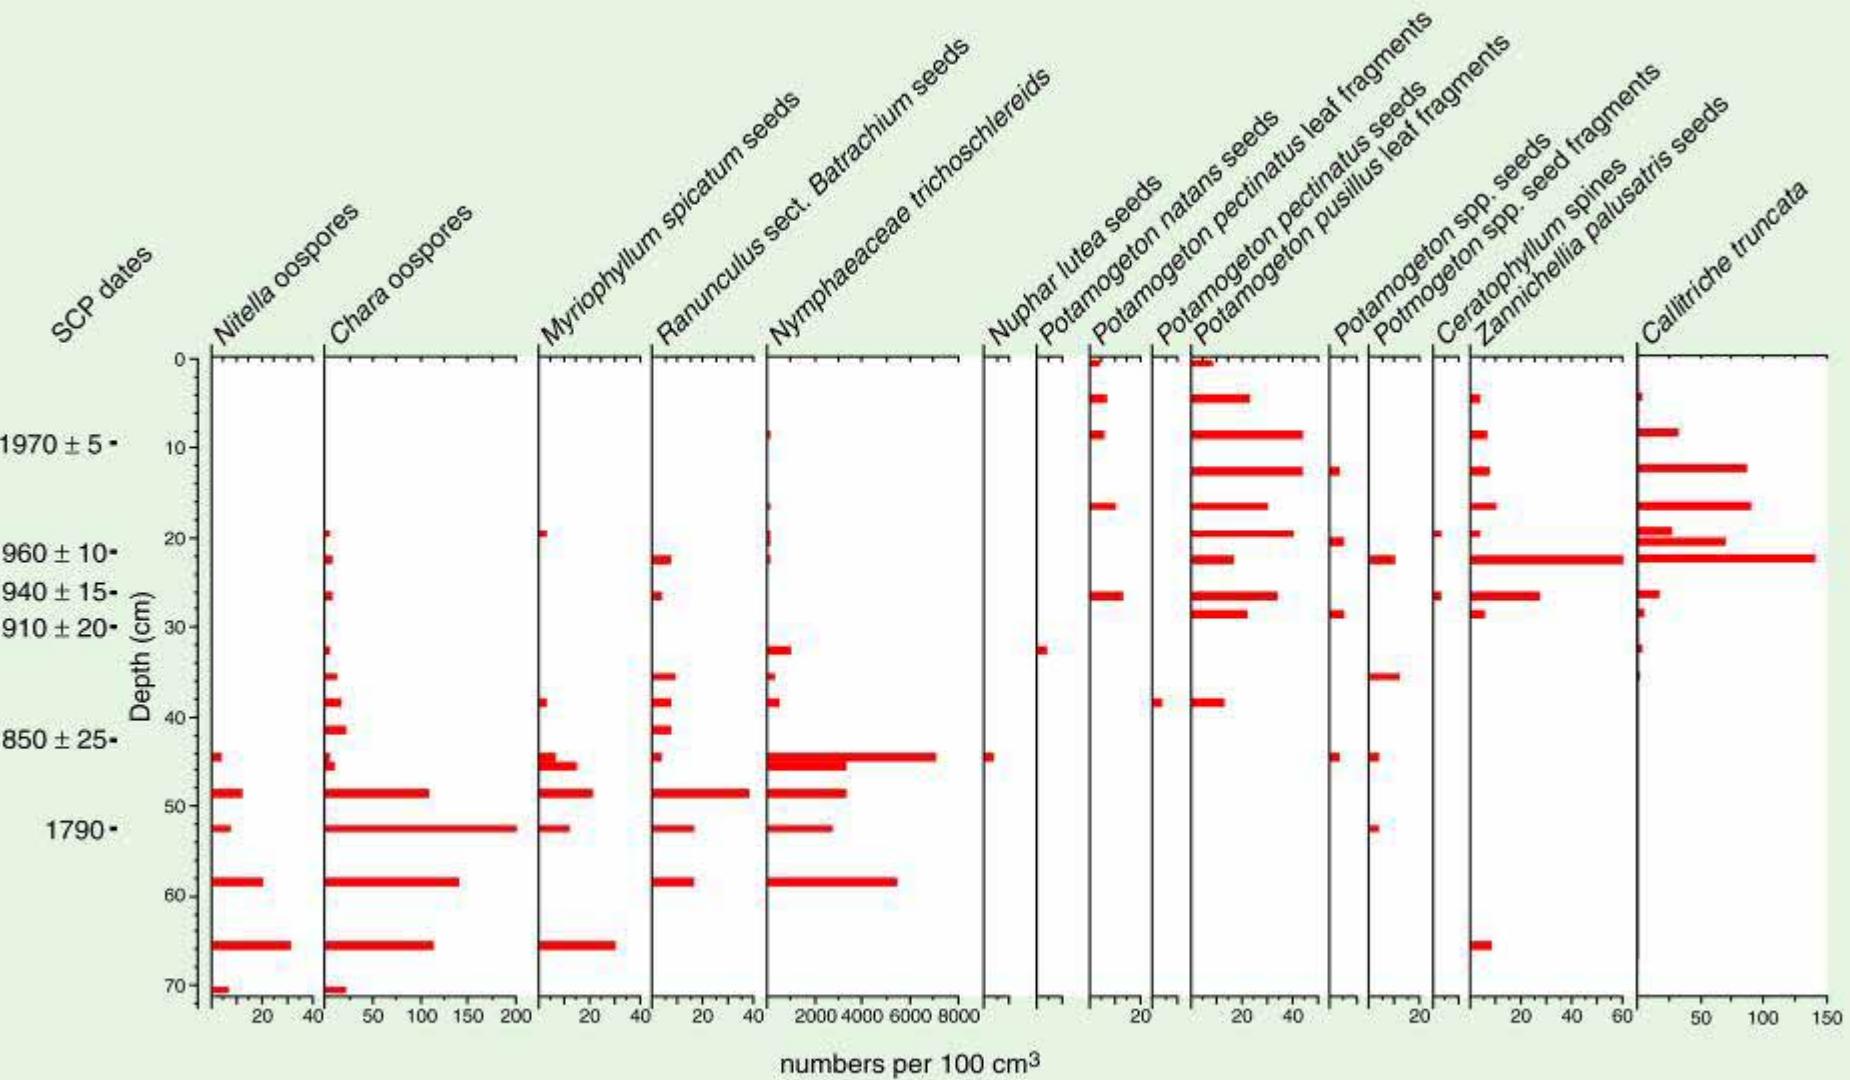

Heteranthera dubia
Myriophyllum heterophyllum
Potamogeton amplifolius
Potamogeton pusillus
Potamogeton zosteriformis
Ranunculus aquatilis
Sagittaria graminea

Use in Paleolimnology

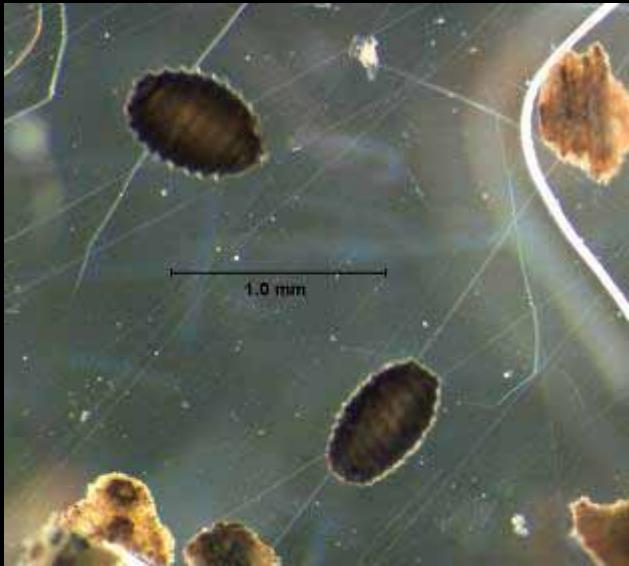

Reconstructing aquatic macrophytes: macrofossils

Macrofossils: diverse bits and pieces preserved

Chara Oocyte
 $C = 7$

Potamogeton pusillus
seed
 $C = 7$

Myriophyllum sp.
flowering structure
 $C = 7-10$

Horse Lake ~1840

Ceratophyllum demersum
leaf tip
 $C = 3$

Najas flexilis seed
 $C = 6$

Horse Lake ~2000-present

A photograph of a pond scene. In the center, a large green plant with a long, narrow, ribbed leaf extends vertically upwards from the water. The water surface is covered with numerous small, round, yellowish-green plants, likely duckweed or similar浮萍. Other larger, broad-leaved aquatic plants are scattered throughout the background.
