# Workplace Solution Suite

FLOWSCAPE

Workplace Solution Suite

Flowscape's Workplace Solution Suite is your one-stop shop for optimizing your hybrid office environment. Our comprehensive solutions provide everything your business needs to streamline and enhance your workspace.

Flowmap

The cornerstone of our solution suite is Flowmap, an interactive color map showcasing desks, rooms, resources, and points of interest. Available resources are depicted in green on our Flowmap, while booked or occupied ones are shown in red. The Flowmap is integrated into our mobile app, desktop software, and kiosk screen display.

FlowPlanner

Easily plan your workweek and coordinate with colleagues using Flowscape's FlowPlanner solution. With a user-friendly interface, employees can seamlessly schedule their office attendance in flexible work environments, checking available spaces and coordinating with others' schedules. They can indicate their status (Office, Remote, or Off work) and plan attendance based on space availability, reducing overcrowding, and enabling productive ad-hoc collaboration. The system also offers an overview of attendees during emergencies and enables data-driven space management strategies for optimized office utilization.

Desk Management

Flowscape's Desk Management Solution facilitates smooth transitions to flexible seating, enabling companies to seamlessly adapt to office, remote, and hybrid work arrangements while maximizing workspace efficiency. Key attributes include desk bookings with flexible rules, optimal desk selection based on equipment and seat availability, sensor-based monitoring of hot desks and drop-in rooms, and accurate data insights for desk utilization and equipment error reporting.

Room Management

Flowscape ensures seamless handling of the entire booking process, covering room reservations, guest invitations, and room location. Scalable for businesses of all sizes, it aligns perfectly with hybrid workplaces, offering efficient room management, integrated booking, and enhanced workplace experiences, including streamlined room management with Room Displays. Core functions include overview of bookable rooms, instant scheduling, and wayfinding. Direct booking from calendars, easy participant invitations, ghost booking prevention and room utilization analysis.

Resource Management

Flowscape's Resource Management solution optimizes resource usage in your office, providing advanced features and a user-friendly interface. Easily reserve parking spots, bike racks, pet seats, and more via mobile or web interfaces, whether in advance or upon arrival. Detailed reports offer insights into resource utilization. Features include real-time availability checks, ad-hoc options, permanent assignments, specific resource identification, visual indicators, and comprehensive analysis with issue reporting.

Workplace Analytics

Gain unparalleled visibility and transparency into office space utilization by leveraging Flowscape's presence sensors and people counting sensors to track booked resources, instances of no-shows, the duration of resource usage, and the number of occupants in each area. This comprehensive insight is facilitated by Flowscape's sensors and robust analytics portal. Access real-time data on the usage of rooms, desks, and various zones within your office environment. Analyze this data across different time frames, including monthly, weekly, or daily views, or specify a custom period for analysis. Apply the collected insights to optimize office resource allocation and inform management decisions related to your workspace.

Visitor Management

Flowscape's Visitor Management Solution provides end-to-end support for the visitor experience, from streamlined check-ins to real-time notifications. Ensuring security and hospitality, it enhances efficiency and visitor satisfaction with a comprehensive approach to visitor management.

Flowscape Solutions

Combine any of our smart solutions to create the perfect digital experience across all your offices. Our multi-tenant functionality enables the booking of both your company's and shared resources in the same building, while Flowscape's Bluetooth indoor positioning solution locates colleagues even when they are on the go. The indoor positioning system can also serve as an in-house Wayfinding system. We can integrate our solution with your access control system to restrict access to those who have booked a desk or a meeting. Flowscape's cloud platform is built on open-interface technology, making it seamless to integrate our solutions with your existing IT systems.
Our solution experts will design the optimum solution that not only addresses your present digital workplace requirements but also anticipates the future needs of your business.
