Frequently Asked Questions

1. [How do I identify a Muncie transmission?](#)
2. [How do I tell the difference between an M-20, M-21, and M-22?](#)
3. [How do I identify a General Motors Borg-Warner T-10 vs. a Super T-10?](#)

How do I identify a Muncie transmission?

Several things are needed to identify a Muncie correctly. The first is a main case casting number. Second a count of the input shaft and output shaft splines and if any rings or grooves exist around the input shaft splines. Third are date codes and VIN numbers that help confirm that the above case and gears belong together. Tooth counts on the input shaft will help confirm a certain gear ratio, but you may not have access to this information if the transmission is still in the car.

Case casting numbers, relating production years and ratios available

Casting: 3831704 Years: 1963 Only Ratios: M20 2.56 1st, M21 2.20 1st

Casting: 3851325 Years: 1964 - 1965 Ratios: M20 2.56 1st, M21 2.20 1st

Casting: 3885010 Years: 1965 - 1967 Ratios: M20 2.52 1st, M21 2.20 1st, M22 2.20 1st

Casting: 3925660 Years: 1968 - 1970 Ratios: M20 2.52 1st, M21 2.20 1st, M22 2.20 1st

Casting: 3925661 Years: 1970 - 1974 Ratios: M20 2.52 1st, M21 2.20 1st, M22 2.20 1st

Ratios of the M20, M21, M22

Year 1963-1965 Type: M20 Rings: None Wide Ratio: 2.56 / 1.91 / 1.48 1.00 / 3.16 Main Drive Gear - 24 Teeth Counter Gear 17-19-22-29

Year 1966-1974 Type: M20 Rings: Two Wide Ratio: 2.52 / 1.88 / 1.46 1.00 / 3.11 Main Drive Gear - 21 Teeth Counter Gear 17-19-22-25

Year 1963-1974 Type: M21 Rings: One Close Ratio: 2.20 / 1.64 / 1.28 1.00 / 2.27 Main Drive Gear - 26 Teeth Counter Gear 17-19-22-27

Year 1967-1974 Type: M22 Rings: None Ratio: 2.20 / 1.64 / 1.28 1.00 / 2.27 Main Drive Gear - 26 Teeth Counter Gear 17-19-22-27

Input Shaft Tooth and Spline Count Related to Year

Year 1963-1965 Type: M20 Rings: None Spline: 10 Tooth Count: 24

Year 1966-1970 Type: M20 Rings: Two Spline: 10 Tooth Count: 21

Year 1970-1974 Type: M20 Rings: Two Spline: 26 Tooth Count: 21

Year 1963-1970 Type: M21 Rings: One Spline: 10 Tooth Count: 26

Year 1970-1974 Type: M21 Rings: One Spline: 26 Tooth Count: 26

Year 1967-1970 Type: M22 Rings: None Spline: 10 Tooth Count: 26

Year 1970-1974 Type: M22 Rings: None Spline: 26 Tooth Count: 26

Please note that there are 7 different Muncie input shafts. All 26 spline inputs came with 32 spline output shafts and all 10 spline inputs came with 27 spline output shafts. A common mistake is thinking that all "fine spline" 26 spline input shafts are M22 heavy duty types. This is not true. An M-22 gearbox has a 20 degree helix angle on the gearset as opposed to a 45 degree angle. Also M-22 gear sets were of a higher nickel alloy. The straighter angle was designed to produce less end loading of the gear train and less heat but created more noise, thus the nickname "rockcrusher". The higher nickel alloy allowed for more impact of the gears. Another misconception is if you have a drain plug you have an M22. Again this was only true when the first M-22 boxes were created. But all 3925661 castings had drain plugs.

Reading Serial and VIN Numbers

Serial numbers for Muncie 4-speeds always begin with the letter "P". P stands for Muncie. The serial number is a date code showing that the transmission was built for a particular year. Serial numbers from 1963 to 1966 included only
