Inspection

Classic Car Annual Complete Digital Inspection Result(s)

Inspection results from SmartFlow Digital Vehicle Inspections
 Includes visual inspection of vehicle.
 Brake inspection with measurements.
 Inspect Air Conditioning Output.

\$179.00

Road test vehicle for proper brake performance (if possible).
 Rack vehicle.
 Remove wheels.
 Inspect front and rear brake lining and brake hydraulics.
 Measure brake drums and/or rotors.
 Inspect brake caliper slides.
 Test brake fluid water content and boiling point and/or
 copper content for corrosion.
 Advise customer of any needed or recommended repairs.
 Record finding.

Front brake measurements
 Right front brake pad: 8mm
 Left front brake pad: 8mm
 Right front brake rotor: .942
 Left front brake rotor: .938
 Brake rotor discard: .875

Rear brake measurements
 Right rear pads/shoes: 6mm
 Left rear pads/shoes: 6mm
 Right rear brake rotor/drum: 10.053
 Left rear brake rotor/drum: 10.060

HVAC Outlet Temperature: Compressor not engaging

Service

5 Month/5,000 Mile Service - Classic

Includes: BG Motor Oil Additive and Fuel System Treatment
Road test vehicle.

- Rack vehicle.
- Remove engine oil drain plug.
- Remove engine oil filter.
- Drain engine oil.
- Replace engine oil filter.
- Replace engine oil drain plug gasket.
- Install drain plug with new gasket.
- Fill crankcase with new, manufacture recommended specification engine oil.
- Add BG Advanced Formula MOA® to crankcase.
- Add fuel system cleaner to fuel tank.
- Lubricate chassis grease fittings and friction points as required.
- Inspect and top off fluid levels. (Additional charges may apply where fluids are required)
- Complete a complimentary comprehensive digital vehicle inspection.

**

BG MOA Benefits

- *Lubricates engine components
- *Keeps engine clean
- *Prevents sludge & deposits
- *Extends oil life

BG 44K Benefits

- *Cleans entire fuel system
- *Removes carbon deposits
- *Restores fuel economy
- *Rejuvenates engine performance

BG EPR Benefits

- *Cleans entire engine
- *Removes sticky oil deposits
- *Reduces oil consumption
- *Increases compression
- *Restores horsepower and torque

Add BG EPR® to the crankcase.

Start engine, bring to full operating temperature and run engine for 20 minutes at 1,200 RPM.

Shut off the engine, drain oil and remove the old oil filter. Proceed with engine oil and filter service.

Technician: Marcus / Service Advisor: Sabrina

Engine oil changes are recommended every 3,000 to 5,000 miles
Engine oil changes help remove engine wear particles and sludge that build up over time and can cause corrosion and decrease the life of your engine.
Regular oil changes also help improve your engine's fuel efficiency, as poor engine lubrication leads to increased fuel consumption.

INVOICE

... and wheels helps even out tire wear and prolongs tire life.
Lift vehicle.
Remove all 4 wheel and tire assemblies.
Visually inspect tire condition and tread wear pattern.
Rotate tire/wheel assemblies - front to back.
Set tire pressure to proper inflation.
Re-torque wheel lug nuts to manufacturers torque specification.
Lower vehicle.
Perform final road test.

\$35.87

Please Note:
Some wheels require lug nut re-torque. Ask your Service Consultant for details.
Keeping your tires properly inflated and rotated will assist in maximizing tire wear life and vehicle handling.

** If your vehicle requires a TPMS re-set, additional fees will apply
Technician: Marcus / Service Advisor: Sabrina

*Tire rotation should be performed every 5,000 miles to prolong the life of you tires.

5 Month/5,000 Mile Service - Preferred
Includes: BG Motor Oil Additive
-- Added by SmartFlow on 5/23/2023 --

Cooling System Service (Suggested every 30,000 Miles or 36 Months)
-- Added by SmartFlow on 5/23/2023 --

Power Steering Fluid Service (Suggested every 30,000 Miles or 36 Months)
-- Added by SmartFlow on 5/23/2023 --

Brake Fluid System Service (Suggested every 24,000 Miles or 24 Months)
Brake fluid is very hygroscopic. It is like a sponge for absorbing water and moisture. Over time, brake fluid becomes contaminated. The water/moisture it absorbs will rust out the inside of brake lines and other brake parts.
