General Motors

Manufacturer Safety recall issued
- NHTSA #14V540
- Transport Canada# 2014379
- Recall #N140445 IGNITION SYSTEM AND UNINTENDED KEY ROTATION
- Status: Remedy Available

Locate an authorized [General Motors dealer](#) to obtain more information about this recall.

⊖ [Learn more about this recall](#)

Description: General Motors has decided that a defect which relates to motor vehicle safety exists in 2011-2013 model year (MY) Chevrolet Caprice and 2008-2009 MY Pontiac G8 vehicles. There is a risk, under certain conditions, that some drivers may bump the ignition key with their knee and unintentionally move the key away from the "run" position. If this occurs, engine power, and power braking will be affected and power steering may be affected, increasing the risk of a crash. The timing of the key movement out of the "run" position, relative to the activation of the sensing algorithm of the crash event, may result in the airbags not deploying, increasing the potential for occupant injury in certain kinds of crashes.

Remedy: Dealers will separate the Remote Keyless Entry (RKE) Transmitter from the key blade and housing assembly. Dealers will then discard the original key blade and housing assembly, ensuring that it is not retained by the customer. Dealers will then cut and fit the revised key blade and housing assembly, in which the blade has been indexed by 90 degrees, to the original RKE transmitter assembly. This will be provided free of charge. Until the recall has been performed, it is very important that drivers adjust their seat and steering column to allow clearance between their knee and the ignition key.

06/17/2015

General Motors

Manufacturer Safety recall issued
- NHTSA #15V399
- Transport Canada# 2015274
- Recall #N150206 FRONT SEAT SAFETY BELT

Status: Remedy Available

Locate an authorized [General Motors dealer](#) to obtain more information about this recall.

 **Learn more about this recall**

Description: General Motors has decided that a defect which relates to motor vehicle safety exists in 2011-2013 model year Chevrolet Caprice and 2008-2009 model year Pontiac G8 vehicles. The flexible steel cable that connects the safety belt to the vehicle at the outside of the front outboard seating positions can fatigue and separate over time as a result of occupant movement into the seat.

In a crash, a fatigued cable could break, reducing the effectiveness of the vehicle's safety belts and increasing the risk of injury to the occupant.

Remedy: Dealers will replace the tensioner assembly, free of charge.

Hmm, we haven't received any information on this car since June 2022. Before you buy, ask the seller for recent service or repair records.

Have Questions? Consumers, please visit our Help Center at www.carfax.com. Dealers or Subscribers, please visit our Help Center at www.carfaxonline.com.

Glossary

Accident Indicator

CARFAX receives information about accidents in all 50 states, the District of Columbia and Canada.

Not every accident is reported to CARFAX. As details about the accident become available, those additional details are added to the CARFAX Vehicle History Report. CARFAX recommends that you have this vehicle inspected by a qualified mechanic.

- According to the National Safety Council, Injury Facts, 2021 edition, 5% of the 276 million registered vehicles in the U.S. were involved in an accident in 2019. Over 77% of these were considered minor or moderate.
- This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 9/23/25 at 4:21:14 PM (CDT). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

Damage Severity

Damage events result in one of the following severity levels:

- Minor: Generally, minor damage is cosmetic (including dents or scratches), may only require reconditioning, and typically does not compromise a vehicle's operation and/or safety.
- Moderate: Moderate damage may affect multiple components of the vehicle and may impair the vehicle's operation and/or safety.
- Severe: Severe damage usually affects multiple components of the vehicle and is likely to compromise the vehicle's operation and/or safety.

CARFAX recommends getting a pre-purchase inspection at a certified collision repair facility.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio,

Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
