Model description

Volkswagen launched its T3 Vanagon in 1980 as a replacement for the company's T2 Bus. True to VW's formula, the Vanagon had a small footprint for ease of driving, but was exceptionally space efficient, which made it highly flexible. The Vanagon (a name that combined "van" and "wagon") could be configured in a variety of ways, from stripped-down cargo van, to a plush family hauler, to a pop-top camper and more. There was even an all-wheel-drive Syncro version.

In the U.S., the Vanagon was initially equipped with a 67-hp, 2.0-liter air-cooled flat four that was mounted in the rear and a four-speed manual transmission was standard. A diesel engine and automatic transmission were later options, and the air-cooled mill was eventually replaced by a more powerful water-cooled flat-four unit.

Because of their emphasis on practicality and utility, Vanagons tended to get used a lot. Rust can be a problem, especially around the windshield and panel seams, and Subaru engine swaps are a common appearance as owners seek a little more power and ease of maintenance. Weekender and Westfalia versions are particularly desirable, and the Syncro models are especially prized near ski destinations.

 Manufacturer MSRP: 16660
 Truck Front Axle: Unknown
 Truck Rear Axle: Unknown
 Market Segmentation: Compact Van
 Truck Gross Vehicle Weight Rating Code: 1
 Manufacturer Code: C176
 Front Tire Size Code: 15

Vehicle's condition classification

#1. Concours

#1 vehicles are the best in the world. Imagine the best vehicle, in the right colors, driving onto the lawn at the finest concours. Perfectly clean, the vehicle has been groomed down to the tire treads. Painted and chromed surfaces are mirror-like. Dust and dirt are banned, and materials used are correct and superbly fitted.

#2. Excellent

#2 vehicles could win a local or regional show. They might even be former #1 vehicles that have been driven or have aged. Seasoned observers will have to look closely for flaws but will be able to find some. The paint, chrome, glass and finishes will all appear as excellent. The vehicle drives as a new vehicle of its era would

#3. Good

#3 vehicles drive and run well but are not used for daily transportation. The casual passerby will not find any visual flaws, but these vehicles might have some incorrect parts. #3 vehicles could possess some, but not all, of the issues of a #4 vehicle, but they will be balanced by other factors such as fresh paint or a new, correct interior.

#4. Fair

#4 vehicles are daily drivers, with flaws visible to the naked eye. The chrome might have pitting, the windshield might be chipped and perhaps the body has a minor dent. Imperfect paintwork, split seams or a cracked dash might be present. No major parts are missing, but there might be non-stock additions. A #4 vehicle can also be a deteriorated restoration.
