- 100% Aluminum Construction
- 16 PSI Radiator Cap
- Black Painted Finish
- Large 3 Row Design

📦 WHAT'S IN THE BOX

- (1) Aluminum Radiator
- (1) Radiator Cap
- (1) Drain Plug

1979-1993 Ford Mustang SVE 3 Row Aluminum Radiator - Black

This SVE Mustang black aluminum radiator is the perfect replacement for your 1979-1993 Fox Body. Bolting right into your Mustang, this lightweight Fox Body radiator is a quick and easy fix for a clogged, leaking, or damaged component. Fits both automatic & manual transmissions. Whether you are daily driving, road racing, or drag racing, this radiator is perfect for any Fox Body! This radiator is finished off with a painted black finish for a great look!

Why Buy An SVE Radiator?

- [Superior Cooling Performance](#) - The large 3-row aluminum design maximizes coolant flow to keep your engine running cooler under any driving condition.
- [Direct-Fit Reliability](#) - Designed specifically for 1979-1993 Mustangs with manual transmissions, it bolts in with no modifications needed.
- [Durability You Can Trust](#) - Constructed from 100% aluminum and pressure-tested for quality, it resists corrosion and lasts longer than stock units.
- [Trusted By Enthusiasts](#) - With over 600 5-star reviews, this SVE aluminum radiator is a favorite among Fox Body enthusiasts.

Do I Need Anything Else For Installation?

While this radiator can be installed on most Mustangs without the need for additional parts, there are a few upgrades you may want to consider while you are replacing your radiator.

- [Radiator Fan/Shroud](#) - When replacing your radiator, this is the perfect time to replace a broken or worn-out radiator fan and shroud. Having a fully functioning cooling system is essential to the performance of your Fox Body's engine.
- [Silicone Hoses](#) - Now is a good time to check the condition of your radiator hoses. The factory rubber hoses are great for factory applications, but for those who want a better upgrade, silicone hoses are the way to go!
- [Upper Radiator Brackets](#) - Don't bolt down a new SVE radiator with old, rusted-out hardware. Grab a set of new 5.0 Resto upper radiator brackets to give your engine bay a cleaner look!
- [Automatic Transmission](#) - auto equipped vehicles will require the use of [Automatic Cooler Line Adapters](#).

Radiator Dimensions:

- 29.25" x 19" x 2" Overall Dimension
- 24.5" x 16.85" Core Size
- 1.25" Inlet Diameter
- 1.5" Outlet Diameter
- 2" Thick Core

Aluminum Radiator Maintenance

Proper maintenance of an aluminum radiator is essential for the longevity and efficiency of your vehicle's cooling system. Start by performing a complete flush of the entire cooling system, including all hoses and the engine block, to ensure it is free from old fluid or contaminants. Always refer to your user manual for the correct type of coolant and maintain a 50/50 mix of coolant and water. Failing to do this can lead to **electrolysis**, where electricity flows through the system, causing severe corrosion and pitting on the aluminum surfaces. To avoid this, regular maintenance every 30,000 miles is recommended, including flushing and inspecting the system. Additionally, **NEVER** use the radiator as a ground for electrical components, as this can accelerate electrolysis and lead to further damage.

🚗 VEHICLE FITMENT

- **Ford Mustang** - 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993

Fitment Notes:

- Fits 1979-1993 Mustang 5.0/2.3 w/ Manual Transmission
- The transmission cooler line ports are a sealed internal tube on the Manual Radiators, these ports will not leak if left open
- Due to the thicker design, clearance on supercharger pulley setups may exist. Modification to the radiator retaining brackets, and pulling the radiator back may be required.
- Drain plug style may vary.

12/07/25

It seems to sit a smidgen lower then the stock one, however I ordered new mount rubbers to replace to original to make sure that wasn't the issue. Seems to be of good quality a d my shroud fit perfectly, I look forward to testing it out.
