Warranty Information

New Parts and Labor are warranted for 1 year from the date of transaction on street driven vehicles only. There is no warranty expressed or implied for used parts, competition applications, Off Road use or any mistreatment or abuse regardless of application. Damage from improper installation, missed shifts, open track events, side stepping clutch, improper shifter installation, low fluid, etc. is not covered under the warranty.

There is no warranty for fluid leaks. All Davids4Speeds rebuilds are reassembled with used and often abused Aluminum or Cast metal that is a least 25 years old. We use gaskets on all joined surfaces and use quality sealer on all gaskets, taper pin and bolts that install into the inner case. Many leaks are due to overfilling the case or not using approved gear lube neither of which we control.

This warranty is for the original purchaser only. Most of our transmissions are built to the customer's specification, which might not correspond with a second owner's desires. No Warranty is offered for discounted purchases.

Claims for repair or replacement of defective parts and/or workmanship on street driven applications are handled on an individual basis. Evaluation of the cause and responsibility for cost is determined by Davids4Speeds staff. Buyer/Owner is responsible for removal and installation of transmission and delivery and pickup from Davids4Speeds shop.

DO'S AND DON'TS

1. Do break in your transmission for 200 miles. There is assembly lube that needs to mix with the trans fluid. Not breaking in the transmission could cause missed shifts and damage to synchros, sliders and bearings.
2. Do fill the transmission with quality 80-90 weight gear lube for transmissions.
3. Do fill to the bottom threads of the fill plug with the transmission resting level.
4. Do NOT over fill the transmission as this will cause leaking from the Bearing Retainer and Rear Seal.
5. Do adjust your shift linkage using a neutral locator pin for the best neutral gate. This will help prevent the transmission from kicking out of gear.
6. Do NOT Dry Shift your transmission without gear lube or while out of car. This can jamb the synchros onto the gears, locking up the gear and causing damage to the transmission.
7. Do NOT use synthetic fluids in this transmission.
