Repair Order 10046 Date 08/25/06

Distributor #1112034 is factory OEM for 1971 Olds '442' 455 V-8. This unit is now spec'd to factory distributor advance curves (calculated in distributor degrees & distributor rpm; multiply figures by 2 for crankshaft degrees and rpm): 1) centrifugal advance begins swing at 450 rpm, moving to 4.5-8 degrees by 550 rpm; 6-8.5 degrees by 600 rpm; 12-14 degrees by 1500 rpm...2) new vacuum advance unit replaces factory 1973427 unit and checks to maximum vacuum advance of 8.75-9 degrees @ 17.2-19 in/hg vacuum. All tests and calibrations are now at factory spec; point dwell (cam angle) of 29.75 degrees allows for normal seating of point rubbing block. Factory dwell range is 28-32 degrees.
