

Leo Owen

Digital Technology Solutions

The basics

Name:

Leo Owen

Apprenticeship:

Digital Technology Solutions

Department:

Consult @ AI Innovation Lab

Employer

Kyndryl

A Typical Week

My current rotation looks like; primarily focused on the client-facing experience - organising visits, gathering materials, taking part in discussions, all while building business problem and networking skills, whilst also balancing my university workload by keeping myself organised.

Why an apprenticeship?

The main reason I chose an apprenticeship was because of the appeal of gaining experience whilst learning in an industry I am interested in, and being able to have a real impact on projects whilst working alongside proven professionals.

Top Tips / Advice

My main advice for anyone interested in an apprenticeship is:

- Know the different levels
- Research the role properly
- Prepare yourself for interviews and assessments
- Trust that you don't need to have everything figured out
