

Charlotte Thomas

Engineering Apprentice

The basics

Name:

Charlotte Thomas

Apprenticeship:

Civil Engineering

Department:

Quality Team

Employer:

Taylor Woodrow

A Typical Week

A typical week for me as a civil engineering degree apprentice involves working on a construction site and supporting colleagues with technical documents as well as learning from my peers. My days at university are spent attending lectures that reinforce and build on what I learn on site.

Why an apprenticeship?

Doing an apprenticeship provides the benefit of gaining real-life experience in an industry you are passionate about. Also, you will be able to achieve a qualification which supports your development as you progress within your role.

Top Tips / Advice

- Don't be afraid to ask questions!
- Learn to effectively manage your time and prioritise your tasks.
- Explore ways to create a healthy work-life blend which works well for you.
