

Gain visibility and control across your warehouses

When your warehouse is in order, every order can be perfect. Better visibility and control of your warehouse operations helps you improve efficiency, reduce waste, and boost your margins.

Prevent pick errors with improved inventory accuracy and system validation that the correct product lot is selected.

Decrease mispicks

Implement best practices with scanning and pick check digits from receiving to shipping, with a system designed to meet the stringent demands of foodservice that focuses on efficiency and error elimination.

Boost pick throughput

Grow fulfillment and decrease mispicks by automating manual processes and implementing enhanced visibility over your warehouse.

Increase labour productivity

Help your staff work more efficiently with online scheduling, load planning tools, mobile device integration and the integrated Labor Management System (LMS) that measures and boosts productivity.

Improve labour efficiency

Enhance shipping accuracy and fill rates while reducing labour hours required with more efficient management, wave picking, mobile device integration, pick by voice capabilities and more.

Expanded visibility and management options

Save time and streamline your processes with automated Count Back, customizable verifications, and rich traceability that keeps track of inventory spoiling and improves your management options.

Quick and accurate inventory valuations

Automatically direct pickers to “Count Back” the inventory to verify appropriate slots and locations.

Even more great benefits to support your business

3PL support

Rent out warehouse space and let the system automatically generate charges and invoices for storage and handling based on each customer's unique billing rates.

Ensure food safety compliance

Built to meet stringent food safety requirements, TELUS Warehouse Management System can track expiry dates, storage requirements, and even allergens.

Meet disparate regulatory requirements

Capture and convert across measurement systems and ensure you meet regulatory requirements as you ship across the globe.
