**SUPERCARS OPERATIONS MANUAL 2025****DIVISION “A” – ADMINISTRATION RULES****A1. PREAMBLE****A1.1 General**

- 1.1.1 All matters pertaining to the conduct of an Event and the operation and recognition of Supercars and the Category will be regulated by the Rules.
- 1.1.2 The Rules are subject to the general authority of the FIA and, in a case where any such provision is in conflict with any rule of the FIA, the rule of the FIA will prevail.
- 1.1.3 In the case of any conflict between the Rules and the National Competition Rules of any ASN, the Rules will prevail.
- 1.1.4 Unless authorised by the Rules, no interpretation, modification or change to anything, referred to in the Rules is permitted.

**A1.2 Automobile and Car - Technical Definitions**

- 1.2.1 Participation in the Supercar Category will be limited to models of Automobiles that comply with the provisions of this Rule.
- 1.2.2 For a model of Automobile to be considered eligible for approval as a Car in the Category it must:
  - 1.2.2.1 Be based on a production Automobile; and
  - 1.2.2.2 Be commercially available; and
    - Have a minimum production volume of 1000 Automobiles worldwide including the manufacturer’s accredited ‘Special Vehicles’ division; and
  - 1.2.2.3 Be of suitable size for the Bodywork to be adapted to the Chassis.
- 1.2.3 To be considered eligible to participate in an Event, a Car must be as homologated and approved by Supercars as detailed in the GSD, relevant VSD and ESD; and
  - 1.2.3.1 Be right hand drive; and
  - 1.2.3.2 Be rear wheel drive; and
  - 1.2.3.3 Be powered by a V8 engine.
- 1.2.4 To be considered eligible for a Super2 Round, a Chassis must have been used in six (6) or more VCS Events.
  - 1.2.4.1 Chassis that have not been used in six (6) or more VCS Events must receive prior written approval of the GMM to be eligible for a Super2 Round.

**A1.3 Car Build Requirements**

- 1.3.1 The GMM must be advised prior to the commencement of any new Car and/or Chassis build.
- 1.3.2 The entire build of a new Car and/or Chassis must be done in Australia.
- 1.3.3 The entire build of a new Chassis must be done by an ACA.
- 1.3.4 The GMM must be advised at least two (2) weeks prior to the scheduled completion date of a new Car build. Supercars reserves the right to conduct an inspection at any time after the commencement of the build.
- 1.3.5 A Car that has not previously been issued with a Motorsport Australia log book as a Supercar must be inspected by the GMM.

- 1.3.5.1 The inspection will take place prior to any Car being presented for scrutineering at its first Event or participation in a Supercars authorised activity.
- 1.3.5.2 The inspection will usually take place in the Team's workshop and all costs incurred by Supercars to carry out any inspections must be met by the Competitor.

#### **A1.4 Technical Parity**

- 1.4.1 The Supercar Category is a technical parity category.
- 1.4.2 The Supercar Category is underpinned by the governing principle that to the extent that it is possible, Competition will take place between the different makes and models of Cars as equalised by the technical parity mechanisms enshrined in the Rules.
- 1.4.3 The technical parity mechanisms used by Supercars include, but are not limited to:
  - 1.4.3.1 Stringently applied technical specifications and homologation requirements; and
  - 1.4.3.2 Aerodynamic equalisation, and
  - 1.4.3.3 The use of Category wide Control Components and Control Specification Components.
- 1.4.4 The Category is not about equalisation of the abilities of participating Drivers and/or Teams (such equalisation could be, and is in some categories, defined as sporting parity). It is up to individual Drivers and/or Teams to Compete to the best of their abilities under the principle of technical parity.
- 1.4.5 Under the umbrella of technical parity, Supercars will use its best endeavours to ensure a level playing field for all competing makes and models of Car in the following specific areas as is reasonably possible:
  - 1.4.5.1 Total Aerodynamic Downforce
  - 1.4.5.2 Aerodynamic Downforce Balance
  - 1.4.5.3 Aerodynamic Drag
  - 1.4.5.4 Centre of Gravity
  - 1.4.5.5 Engine Power
  - 1.4.5.6 Fuel Consumption
- 1.4.6 Supercars is dependent upon the input of the individual Homologation Teams and cannot be responsible for any of those Teams presenting cars and/or engines for homologation that are uncompetitive. Supercars will offer guidance to help Homologation Teams whenever reasonably possible.
- 1.4.7 The benchmarks for technical parity will always be the incumbent makes and/or models, whether regarding engine or aerodynamic performance, and never an incoming make and/or model. The onus is on the relevant Homologation Team for an incoming make and/or model of car to reach the existing benchmarks set for technical parity, and the onus is upon Supercars to ensure that these benchmarks are not exceeded.
- 1.4.8 Over and above these obligations, Supercars is obliged to enforce the Technical Rules included in the Operations Manual at all relevant times including, but not limited to, ensuring the correct use of Control Components and Control Specification Components, both of which are a vital part of the technical parity principle.
- 1.4.9 As a result of new makes/models of car being run by single teams – as opposed to multiple independent teams running the same makes/models of car in competition with one another – it is important to recognise the importance of continuing to make the distinction between technical parity and sporting parity.

## **A1.5 Homologation Team**

- 1.5.1 Each make of Car in the Championship will be represented by an official Homologation Team at all times. The identity of each Homologation Team is decided by simple majority of the Teams in the Championship running a particular make of Car.
- 1.5.2 Each Homologation Team is responsible for all aspects of the homologation process for their particular make of Car, including the preparation of the VSD, ESD and the Manufacturer Supplied CAD.

## **A1.6 Technical Parity Review**

- 1.6.1 The Board of Supercars, upon the recommendation of the GMM, may, at their discretion, order at any time during a Season that a parity review between all makes and models of Cars be undertaken.
  - 1.6.1.1 The results of any such parity review, following consultation with the Supercars Commission, will then be referred to the Board of Supercars by the GMM;
  - 1.6.1.2 If in the opinion of the Board of Supercars, a significant disparity exists between one or more of the makes and models of Cars competing in the VCS, it will ask the GMM to develop a parity adjustment program that will take account of the time available to correct the identified disparity and that may, amongst other things, include the requirement to develop, test by any means and re-homologate components that will be effective in correcting the identified disparity.

## **A1.7 Conduct of Events**

- 1.7.1 The 2025 Championship is an FIA approved restricted International Series.
- 1.7.2 The 2025 Super2 Series is a Motorsport Australia approved National Series.
- 1.7.3 The Championship and Super2 Series will be conducted under the provisions of the ISC including appendices, the Rules, and any applicable provision of the NCR which are not in conflict with the Rules, including the Supplementary Regulations, instructions, and any Bulletins issued for an Event.
- 1.7.4 The Championship will be listed in the 2025 FIA International Calendar.
- 1.7.5 The Event calendar for the Championship, which may be subject to change, is set out in [Schedule A1](#).
- 1.7.6 Unless otherwise stated in Supplementary Regulations, the format of each Event in the Championship is listed in [Schedule A2](#).
- 1.7.7 The Super2 Series will be listed in the Motorsport Australia National Calendar.
- 1.7.8 The Event calendar for the Super2 Series, which is subject to change is set out in [Schedule A3](#).
- 1.7.9 Unless otherwise stated in Supplementary Regulations, the format of each Round is listed in [Schedule A4](#).

## **A1.8 Commencement and Duration**

- 1.8.1 The provisions of the Rules take effect on 1 January in each year and will continue unless amended by Supercars.
- 1.8.2 Upon taking effect, the Rules will supersede and replace any previous Rules or regulations, however described, relating to Supercars.

1.8.3 Any ruling, advice or exemption provided by any Supercars authorised personnel prior to 1 January 2025 will be superseded by the Rules.

### **A1.9 Application**

1.9.1 The Rules apply to all Competitors, Participants and Officials.

### **A1.10 Variations**

1.10.1 Subject to the terms of the TRC, Supercars reserves the right to vary or amend the Rules at any time.

1.10.2 Any such amendment or variation will be advised to Competitors within a reasonable time according to the circumstances. At an Event, the Stewards may decide that an amendment or variation is required for reasons of safety or Force Majeure, in which case the Stewards will issue such amendment or variation by way of a Bulletin.

1.10.3 Any update to the Rules will take effect from the date of the document advising of such update.

### **A1.11 Start and End of a Competition**

1.11.1 A Competition is considered to have begun as from the time scheduled for the beginning of administrative checking and/or scrutineering.

1.11.2 A Competition will end upon expiry of one or other of the following time limits, whichever is the later:

1.11.2.1 Time limit for protests or appeals or the end of any Hearings;
