

SAFETY INSTRUCTIONS

Fast 5988N Nuuday

BEFORE INSTALLING OR USING THE PRODUCT, READ THESE INSTRUCTIONS CAREFULLY. PLEASE STRICTLY OBSERVE THE PRECAUTIONS IN USE.

To avoid any risk of fire, electrical shock or injury, the product should be used in compliance with the basic safety precautions, including:

- always follow the installation instructions given in the documentation provided with the product.
- do not connect or use this product during thunderstorms. Interference from the mains and/or telephone network can cause electric discharges in the product and electric shock. Furthermore, if the product is used for voice communication, acoustic shocks may occur in the earpiece of the product, and excessive acoustic pressure can cause deafness.

The product must be installed inside a building and the case of the product must not be opened.

The product is designed to be used in vertical position. When the product is fixed in height, it should be installed at a maximum height of 2 meters.

The identification information is located on the power supply unit and on the bottom or the exterior of the product.

POWER SUPPLY

Only use the power unit and power accessories supplied. Connect them to the mains in accordance with the installation instructions in this booklet and with the indications on the identification label affixed to the power unit of the appliance (mains voltage, current, frequency).

Using power sources other than those recommended for this equipment may cause overheating or deformation of the appliance and cause an electric discharge or a fire to break out.

ACCESSIBILITY & ELECTRICAL OVERLOAD

Make sure the power unit is easily accessible and as close as possible to the equipment so that the appliance can be unplugged quickly in case of a problem.

Do not plug too many devices into a mains socket block or extensions as this increases the risk of fire or electric shock.

DAMAGE REQUIRING REPAIR

Unplug the appliance from the mains socket and have it repaired by a qualified after-sales service if:

- the power supply or its plug are damaged;
- one of the cables supplied is damaged or frayed;
- you have spilt a liquid into the appliance or it has been exposed to rain or water;
- the appliance does not function normally or there is considerable variation in its performance;
- the appliance has fallen or is damaged in any way
- there is any sign of overheating;

If any small metal objects such as pins, paper clips, etc. accidentally get inside, disconnect the equipment from the mains as quickly as possible (risk of electric shock) and contact your Customer Service to find out what to do. Do not re-connect the product until all foreign bodies have been removed. Unplug the product immediately if you notice the smell of burning or smoke. You must under no circumstances open the appliance yourself because of the risk of electric shock.

This equipment has been designed for private use inside a building.

The ports Ethernet PORT1 to PORT5 are intended to be connected to indoor cable circuits that are exclusively located within the building where this product is installed, and don't terminate on a remote equipment earthed to a different earthing network.

In certain environments or circumstances, the use of wireless devices may be prohibited by the owner of the building or representatives of the organization concerned. If there is any doubt as to the policy applying to the use of wireless equipment in a specific organization or environment (e.g. in airports), you are advised to ask permission to use the appliance before switching it on. Sagemcom Broadband SAS decline all responsibility in case the regulations in force are not respected in the place of use and if there is radio interference caused to a third party due to the non-respect of the national regulations for this application.

Prolonged exposure to high temperatures may cause malfunctions, or even irreversible damage.

Take care of your device to extend its lifespan and maintain quality.

RF SAFETY INFORMATION

The 4G/5Gnr wireless module has an internal antenna. For optimum performance with minimum power consumption, do not shield the device or cover with any object. Covering the antenna affects signal quality and may cause the 4G/5Gnr wireless module to operate at a higher power level than needed. External antennas are not provided with the product.

If an outdoor antenna is used, the equipment must be installed by a qualified technician and it is recommended that coaxial cable shielding be earthed, in accordance with national safety regulations for cable distribution networks. External antennas must be compatible with radio-frequency bands of 700MHz, 800MHz, 1.7GHz, 1.8GHz, 2.6GHz and 3.5GHz and must respect the following maximum gain: 14dBi.

EXTERNAL DISH ANTENNA, PROTECTION AGAINST ELECTRICAL SURGES

During an electrical storm, an ungrounded antenna can lead to damage of the associated equipment and life-threatening conditions for humans surrounding it. External dish antennas must be earthed. If an outdoor antenna is used, the equipment must be installed by a qualified technician.

Sagemcom hereby confirms that this product complies with the fundamental requirements and other relevant provisions set forth under directive 2014/53/EU. This marking certifies that the equipment is compliant in respect of the health and safety of users, the electromagnetic compatibility of the equipment and the correct use of the radio frequency spectrum and reduction of the impacts of the product on the environment.

The maximum transmitted power in the product is as follows:

- 2400 - 2483.5 MHz: 100 mW
- 5150 - 5350 MHz: 200 mW
- 5470 - 5725 MHz: 1 W

Restrictions: The device is intended for indoor use only on the 5150 to 5350 MHz frequency band in member states.

This radio equipment is subject to certain restrictions when marketed in Belgium (BE), Bulgaria (BG), Czech Republic (CZ), Denmark (DK), Germany (DE), Estonia (EE), Ireland (IE), Greece (EL), Spain (ES), France (FR), Croatia (HR), Italy (IT), Cyprus (CY), Latvia (LV), Lithuania (LT), Luxembourg (LU), Hungary (HU), Malta (MT), Netherlands (NL), Austria (AT), Poland (PL), Portugal (PT), Romania (RO), Slovenia (SI), Slovakia (SK), Finland (FI), Sweden (SE), Northern Ireland (UK (NI)), Norway (NO), Switzerland (CH), Iceland (IS), Turkey (TR), Liechtenstein (LI).

This symbol means that when the appliance is to be disposed of, it must be collected separately and not put with household waste. To this end, the European Union has introduced a specific collection and recycling scheme for which the manufacturers are responsible.

- Collection points are at your disposal locally (recycling centers, sorted waste collection, etc.).
- Retail outlets will take back end-of-life equipment free of charge when purchasing equivalent equipment.
- To make recycling easier, follow the sorting rules for packaging waste.

This appliance has been designed and manufactured using high quality materials and components that can be recycled and reused.

Electrical and electronic appliances may contain items that, though essential for the appliance to function, may be dangerous to health and the environment if they are not properly handled or disposed of. This is why you should not dispose of your appliance with household waste.

- If you are a professional user, refer to your supplier's instructions.
- If the appliance is rented out or deposited, contact your service provider.

Help us to protect the environment we live in!

INFORMATION RELATIVE TO ENERGY-RELATED PRODUCTS TESTING (per Directive 2009/125/CE of the European Parliament)

Power consumption in off mode: 0.08 W max

Power consumption in active mode (Max): 11.5 W

Power consumption in standby mode: 7.0 W max after 15 minutes of inactivity

The "Wi-Fi" wireless interface can be deactivated using the graphical user interface.
