# Pressure Regulators / Manifold Valve

Breakthrough  
engineering for  
a better world

## Pressure Regulators / Manifold Valve

- Releases pressure safely - air station is vented or shut off if pressure is too high, or can regulate and distribute a high pressure input to several low pressure outputs
- Versatile system - varying output pressures from one input
- Long product life - soft starts and safety diaphragm / slam shut mechanisms prevent damage to the air station and downstream equipment
- Consistent pressure - once set, the pressure regulating domes automatically regulate output pressure
- Compact solution - reduced number of valves - one valve does the job of many

### Technical features

**Pressure [bar]:**  
Up to PN 300

**Size Range:**  
Up to DN 100

**Materials:**  
Nickel Aluminium Bronze (NAB)  
Stainless Steel

**Temperature Range:**  
Max. working temperature: 100°C  
Min. working temperature: -20°C

### Systems Support

Submarines

High Pressure Air

Hydrogen System

Nitrogen System

Oxygen System

Surface Ships

High Pressure Air
