Stepper Motor Actuators

Breakthrough engineering for a better world

SM

Stepper Motor Actuators

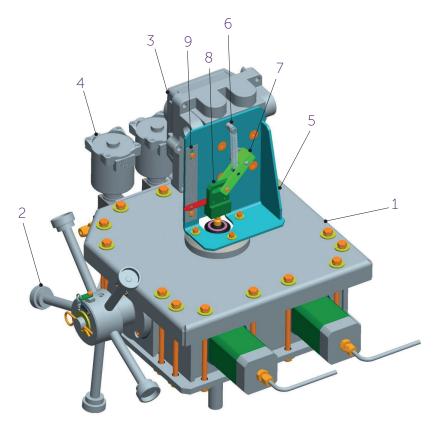

The SM stepper motor actuator has an internal mechanism which is arranged to be interfaced to the female thread of the threaded valve stem. Two hydraulic or pneumatic actuators drive the rotation of the internal mechanism of the stepper motor, one clockwise and the other anticlockwise, thus allowing the rotation in defined steps and the linear movement of the threaded rod. These actuators are available in different sizes to meet different torque requirements.

Product features

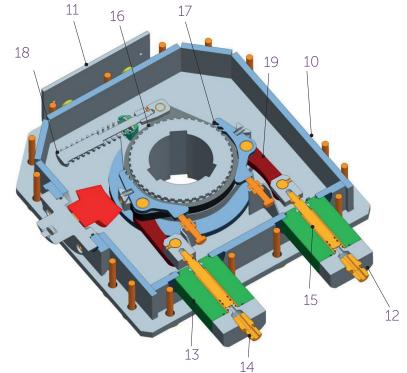

Available in two different versions: Hydraulic Pneumatic Declatchable manual override on the side.

Hydraulic/pneumatic actuators without internal springs (one spring allows the return of both hydraulic/ pneumatic actuators). Hydraulic / pneumatic actuator driven in both directions to provide control.

Product breakdown

	Description	Material
1.	Cover	Carbon steel
2.	Operating wheel	Carbon steel
3.	Position transmitter	Stainless steel
4.	Solenoid valves	Stainless steel
5.	Position transducer	Stainless steel
	support	
6.	Extension spring	Stainless steel
7.	Transducer connecting Stainless steel	
	rod	
8.	Link box transducer	Stainless steel
9.	Stroke indicator	Stainless steel
10.	Вох	Carbon steel
11.	Tool plate	Stainless steel
12.	Head cylinder	Stainless steel
13.	Cylinder body	Stainless steel
14.	Piston bushing	Bronze
15.	Piston rod	Stainless steel
16.	Ratchet wheel	Alloy steel
17.	Ratchet	Alloy steel
18.	Spring	Carbon steel
19.	Connecting rod	Alloy steel

Technical specifications

Operating pressure 70 bar to 250 bar (oil) 4 bar to 10 bar (air)

Standard supply medium Oil, instrument air

Stroke Up to 4" (100mm) (higher values on requests) Standard operating temperature -20°C to 70°C (lower or higher temperature on request)

Output torque Up to 400 Nm (higher values on requests)

Internal mechanism 15 step / run

Benefits

Direct connection between position transmitter and valve stem without intermediate mechanism.

Linear and visible stroke indicator.

Manual override detachable attachable (user defined). provided in case of loss of mechanism forces.

Available with two 3-way solenoid valve and other accessories.
