Reimagine driver training

interactive   customizable   flexible   connected

carriers EDGE ®

: content

Comprehensive, but not complicated. Understandable, but not patronizing. Our 70+ courses translate complex regulations into real-world context that drivers understand, providing an interactive learning experience that's equally effective regardless of learning style, language skills, or educational background.
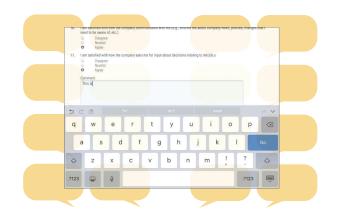

: customization

Upload Powerpoint, video, and more to make your own company-specific training modules. With support for multiple file formats, automatic conversion and optimization, and flexible configuration options, creating online content has never been easier.

: communication

With surveys and polling features built into the CarriersEdge system, you can also get customized, direct feedback, when and how you want it. Survey management tools let you create surveys from scratch or use preconfigured templates.

All this, plus full event management, detailed tracking and reporting, and the industry's first dedicated driver training mobile app.
