Language Support for CallMiner

CallMiner offers language support for all languages listed below. Prior to customer use, CallMiner must certify the language.`

For each of the languages listed below (all of which are available for post-call analysis):

- [*] Indicates language is already certified for real-time (in addition to post-call) PCI redaction
- [†] Indicates language is already available for use with post-call PII, PHI and other entity redaction

Looking to certify an additional language?

CallMiner will certify any language listed with your help. Test data may be required in order to complete certification. Speak to your sales director today to begin the process.

Also note: CallMiner offers support for English, Spanish and French within the product user interface.
