Medical Air - QLD

Description

Air, the earth's natural atmosphere, is a non-flammable, colourless and odourless mixture of gases in which nitrogen (78%) and oxygen (21%) predominate. The balance of less than 1% is compsed of the rare gases helium, neon, argon, krypton and xenon. Supplied in high pressure in metal cylinders.

Applications

- Medical grades of air are used for human respiration in breathing apparatus and the dry grades may be used for driving surgical air tools.

Hazard statement(s)

- Contains gas under pressure; may explode if heated..

Prevention statement(s)

- None allocated.

Response statement(s)

- None allocated.

Storage statement(s)

- Protect from sunlight. Store in a well-ventilated place.

Other hazards

- No information provided.

Signal Word:	Warning
UN No.:	1002
