Capability **Statement**

DATALYNC

Care : Technology : Integration

Keeping People
Connected.

About Us

Data Lync is a **technology integration** firm specialising in services for the aged, community and health care sectors.

We procure, install, configure and maintain a range of systems and technologies, designed specifically to meet the unique needs of the residents, patients and staff who will use your facilities.

① NEW DEVELOPMENTS

② EXISTING UPGRADES

SOLVING COMPLEX TECHNICAL PROBLEMS

It's what we do.

Wireless Networks
IT Consulting & Managed Services
Care Technology Systems
Mobile Device Management
New Facilities

Wireless **Networks.**

Our wireless networks support multiple services including voice applications, resident or patient management systems, alarming and paging, secure corporate network access and flexible resident and guest internet access.

> **Central management for standalone, independent living units or multiple sites**

> **Optimised, secure and manageable guest networks**

> **Corporate wireless networks in keeping with internal IT security requirements**

Care Technology
Systems.

Patient and resident care technology can be a literal life-saver.

Our integration services and software systems can assist in reducing risk while also providing your staff with access to detailed reports and valuable insights into patient care.
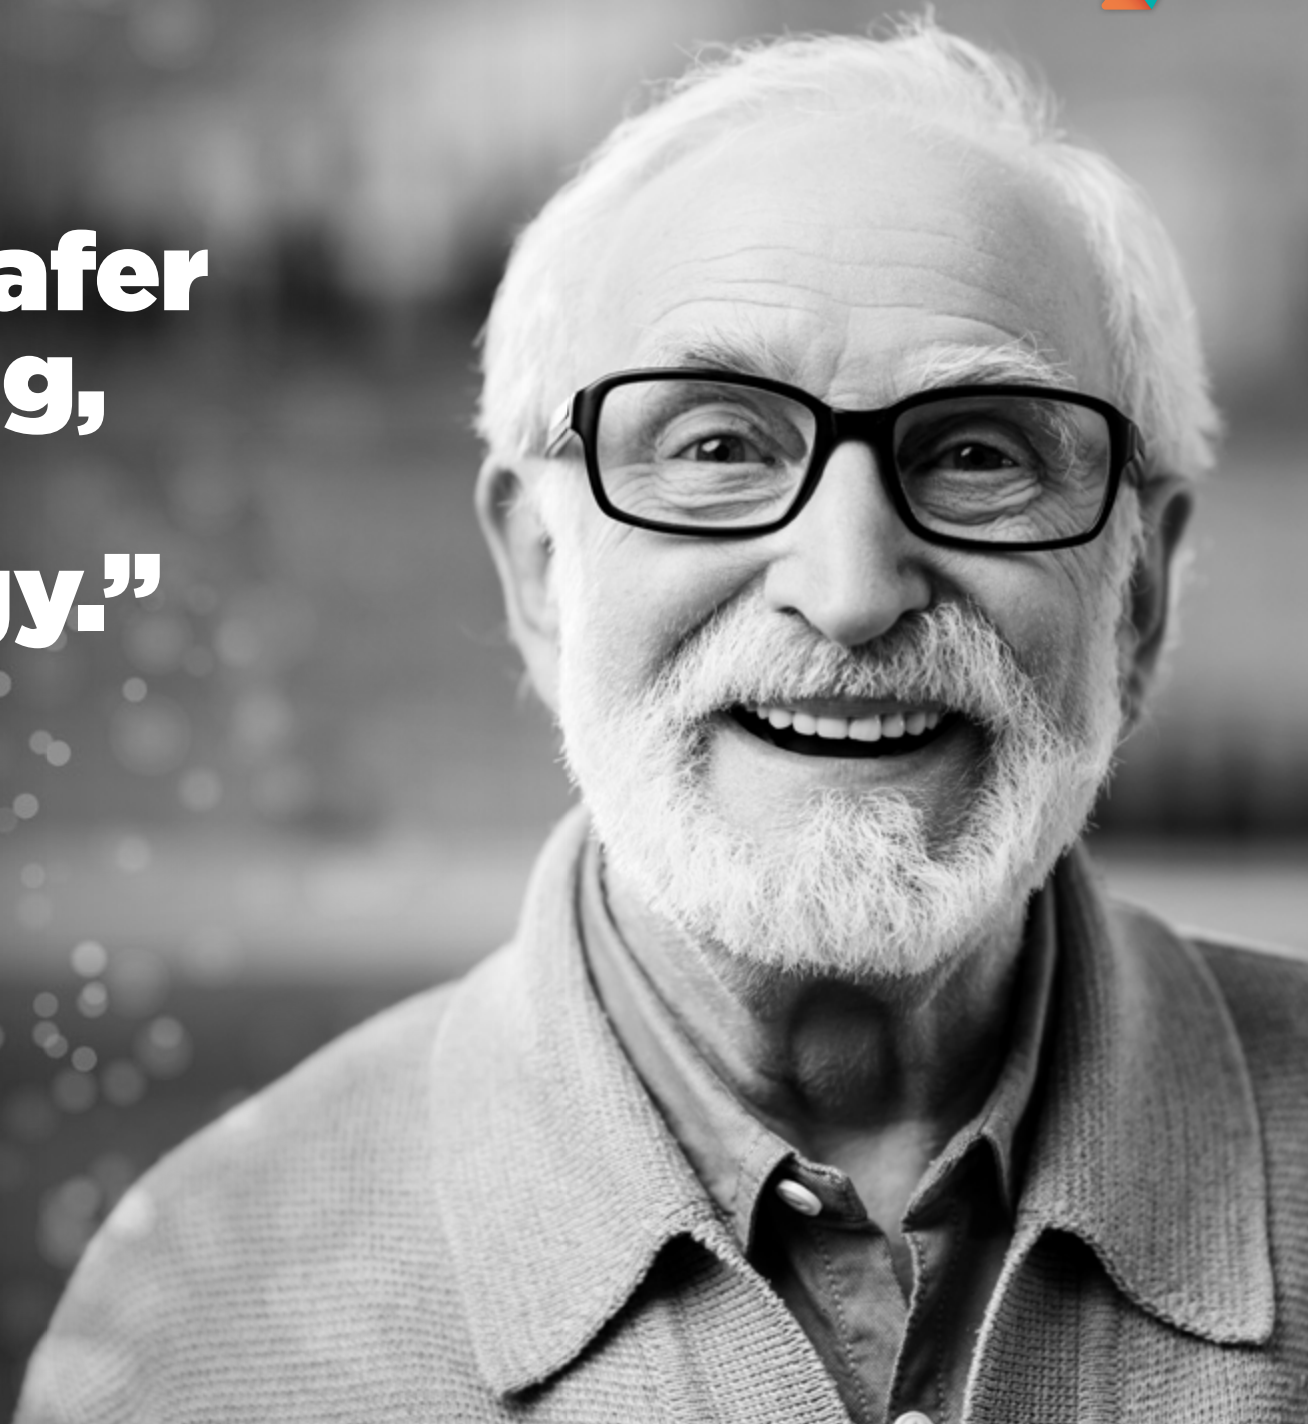

> **Nurse-call and duress solutions**

> **Trackers, including wearables**

> **Middleware integration and alarming solutions**

> **Extend the functionality of existing legacy systems with reporting**

> **Fully managed support for care systems**

# "Experience safer assisted living, supported by technology."

Data Lync understand the needs of our clients and the communities they provide for.

IT Consulting
& Managed Services.

Data Lync offers a range of IT consulting and managed services.

> **Microsoft Azure and Office 365**

> **Cloud migration projects**

> **Multi-user desktop environments including Citrix Virtual Apps, Virtual Desktop and Nutanix Frame.**

> **Nutanix backup and Disaster Recovery as a Service (DRaaS)**

> **Hardware and software procurement. We are partners with many vendors including Citrix, Nutanix, Sophos, HPE/Aruba, Lenovo and more.**

Mobile Device
Management.

Data Lync designs, deploys and supports a range of mobile and fixed devices. We have extensive experience in health care and specialise in:

> **Medication Tablets/Laptops**

> **Corporate use devices**

> **Kiosk and reception devices**

We understand and implement secure policies to meet the complex requirements in healthcare.

DEFINING THE DATA LYNC DIFFERENCE

We offer:

> Solutions that are specifically focused on the needs of organisations that provide care

> Extensive knowledge and experience in IT

> Custom-designed solutions for every project

> Servicing for greenfield and established sites

> A thorough understanding of the sector

New
Facilities.

Data Lync offers consulting services for developers and care providers for greenfield and brownfield projects.

We provide independent advice on many aspects of building information technology requirements. Because we often do not provide the services directly, our incentives align with the owner to help deliver the best possible outcome.

We can advise on:

> **Core network backbone (GPON vs Switched Networks)**

> **Wireless requirements including professional coverage maps**

> **Care Technology Systems including Nursecall**

> **Integration of devices (e.g. robotics with lift panels, or fire panels and wireless handsets)**
