

>SOLUTION BRIEF_

Cribl Stream QuickConnect

THE CHALLENGE

Onboarding new data sources and troubleshooting existing ones can be time-consuming. Teams need efficient tools to get data flowing as quickly as possible — and keep it that way.

THE SOLUTION

Cribl Stream QuickConnect is the fastest way to connect data from multiple sources to destinations while enabling better testing and controlling costs.

THE BENEFITS

Save time:

- Cut down on onboarding time for new data sources.

Visualize connections:

- Easily see source to destination connectivity.

Faster troubleshooting:

- Quickly correct issues with new connections, or stand up testing environments to avoid them.

Control costs:

- Low-code functionality reduces administrative overhead and speeds development.

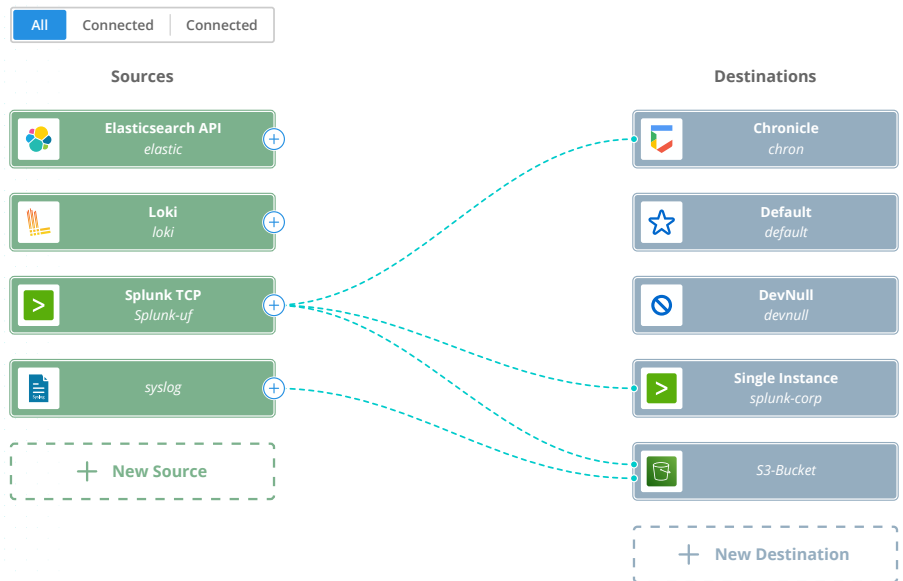

Routing data to the right tools and destinations gives you the flexibility to optimize your IT, security, observability, and telemetry data efforts. QuickConnect helps you get the right data into the tools you choose — fast.

The challenge.

Organizations need to collect, store, and analyze data to improve IT and security service delivery. That said, collecting and sending data from various sources to multiple destinations can take a lot of time. When a source or destination has issues, troubleshooting can derail processes, and maintenance and administrative costs can start to pile up. Teams need a faster, easier, and more cost-effective solution to quickly onboard new sources and get data flowing.challenging. Security teams are inundated with data from multiple sources and formats, making it difficult to detect and respond to breaches.

The Cribl solution.

Cribl Stream's QuickConnect tool is the fastest way to get data from any source to any destination. QuickConnect's visual rapid-development UI enables you to get data flowing with next to no configuration, saving time and reducing overhead. Visualize your data connections for better visibility and faster troubleshooting. When you pair QuickConnect with Stream's other capabilities, you can easily reduce, transform, and shape your data on the way to any destination.

QuickConnect provides a GUI-based approach to data onboarding and routing, while accelerating time to value.

Move data quickly.

QuickConnect's drag-and-drop functionality allows users to get data moving in just a few clicks. Pair QuickConnect with Stream's other capabilities to reduce, transform, and shape data in flight to the destination of your choice. Enrich events with GeoIP data or remove null fields. Send data to lower-cost object storage, like Cribl Lake or any other solution, to free up space in your analytics tools and keep more data, longer, for less.

Visualize your data for faster troubleshooting.

QuickConnect gives teams an easy way to see connections, so they always know exactly where their data is going. QuickConnect's interface surfaces issues with sources and destinations fast, enabling better troubleshooting. Stand up test environments to try out new connections or resolve issues with existing ones.

Optimize overhead and speed up development.

QuickConnect provides a GUI-based approach to data onboarding and routing, while increasing time to value. QuickConnect's low-code functionality reduces administrative overhead and speeds up development, so teams can spend time where it counts – scaling your business.

Summary.

QuickConnect is the fastest way to get data from any source to any destination. With QuickConnect, teams can create and visualize data connections for swift onboarding and smooth troubleshooting. QuickConnect's approach to data onboarding and routing gives you a low-code way to get data flowing. Drag and drop your way to full control over your data.

ABOUT CRIBL

Cribl, the Data Engine for IT and Security, empowers organizations to transform their data strategy. Customers use Cribl's vendor-agnostic solutions to analyze, collect, process, and route all IT and security data from any source or in any destination, delivering the choice, control, and flexibility required to adapt to their ever-changing needs. Cribl's product suite, which is used by Fortune 1000 companies globally, is purpose-built for IT and Security, including **Cribl Stream**, the industry's leading observability pipeline, **Cribl Edge**, an intelligent vendor-neutral agent, **Cribl Search**, the industry's first search-in-place solution, and **Cribl Lake**, a turnkey data lake. Founded in 2018, Cribl is a remote-first workforce with an office in San Francisco, CA.
