

>SOLUTION BRIEF

Maximize cloud security with Cribl and Wiz

THE CHALLENGE

Growing data volumes, combined with the shift toward cloud environments, make it harder to maintain visibility and focus on the threats that matter.

THE SOLUTION

By using Wiz and Cribl Stream together, you can bridge gaps and accelerate investigations by deduplicating, transforming, and enriching data.

THE BENEFITS

- Comprehensive cloud security visibility.
- Seamless routing to multiple destinations.
- Simplified reporting and regulatory compliance.
- Enhanced operational efficiency with higher data quality.

As Wiz analyzes your cloud data, Cribl facilitates its visibility, routing, and retention. Respond faster and enhance your security posture.

The challenge

As technology evolves, data volumes surge — and security data is no exception. This growth, combined with the shift toward cloud environments, makes it harder to gain comprehensive visibility and to separate the meaningful alerts from the noise. To keep pace, teams need smarter solutions that simplify data management and strengthen security responsiveness.

The solution: better together

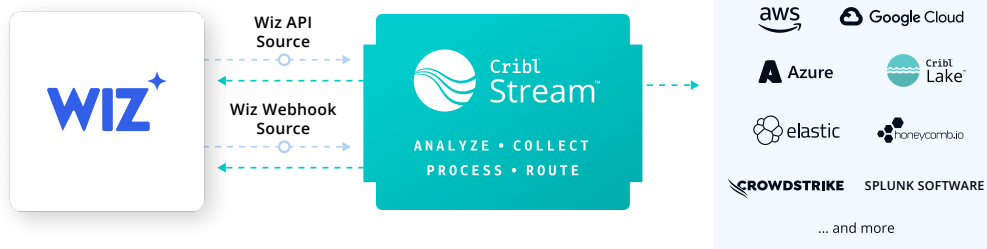

Integrating Wiz with Cribl gives security teams the insight and control to respond quickly to potential threats and maintain a stronger security posture. Wiz Cloud continuously scans your environment for risks such as misconfigurations, exposed secrets, and excessive privileges, and Wiz Defend builds on that foundation by extending detection across all your cloud environments.

Cribl Stream brings these findings to life by simplifying your data routing, transformation, and management. With dedicated integrations, it pulls cloud security data from Wiz Cloud and Threats and Detections from Wiz Defend, letting teams automatically schedule, collect, and analyze data; or they can fine-tune synchronization through Cribl's REST API Collector for greater precision and efficiency.

GET STARTED WITH CRIBL AND WIZ TODAY

Together, Cribl and Wiz enable you to enhance your security operations, improve data quality, and make more efficient use of your security tools.

- With continually growing data volumes, enterprises need solutions that simplify telemetry data management and maximize efficiency.
- Cribl and Wiz together streamline telemetry workflows, giving teams enhanced data visibility. By making data accessible and actionable, enterprises can modernize their data management strategies and unlock the full potential of their data.

The benefits of using the Wiz and Cribl Stream integration

Gain immediate visibility into your cloud security

Wiz's agentless-first approach comprehensively scans across cloud resources, identifies risks, and prioritizes them.

Shape and route your data

Use Cribl Stream to flexibly transform and route data from Wiz to multiple destinations, enhancing overall data visibility and access.

Boost operational efficiency

Optimize data routing, reduce data redundancy, and enhance the overall operational efficiency of data security management.

Comprehensive risk views

Facilitate audits and regulatory reporting by providing complete and easily accessible views of enterprise risks.

Simplify storage and compliance

Streamline the integration of compliance-focused data into long-term storage solutions to ease adherence to regulatory standards.

Summary

As data volumes skyrocket and budgets tighten, maximizing the value and visibility of your security data is essential. Cribl, the Data Engine for IT and Security, tightly integrates with Wiz to solve this. Cribl Stream enhances collecting, transforming, routing, and storing massive amounts of security data. Together, you gain the flexibility and control to improve threat detection, accelerate incident response, and simplify compliance, helping teams cost-effectively modernize their security operations.

ABOUT WIZ

Wiz secures everything built and run in the cloud. The platform powers a new operating model for security, development, and ops teams by providing a holistic view of risk. Protecting 50% of the Fortune 100, Wiz gives everyone clear visibility into their cloud and AI environments, enriched with context so they can prioritize what matters most.

ABOUT CRIBL

Cribl, the Data Engine for IT and Security, empowers organizations to transform their data strategy. Customers use Cribl's vendor-agnostic solutions to analyze, collect, process, and route all IT and security data from any source or in any destination, delivering the choice, control, and flexibility required to adapt to their ever-changing needs. Cribl's product suite, which is used by Fortune 1000 companies globally, is purpose-built for IT and Security, including **Cribl Stream**, the industry's leading observability pipeline, **Cribl Edge**, an intelligent vendor-neutral agent, **Cribl Search**, the industry's first search-in-place solution, and **Cribl Lake**, a turnkey data lake. Founded in 2018, Cribl is a remote-first workforce with an office in San Francisco, CA.
