

MAKE YOUR DATA, YOUR DATA

Be unstoppable

Unlock value from all your data and make it easy to access and explore with any tool in your organization.

IT AND SECURITY FACE TIDAL WAVE OF DIVERSE DATA

28%

Data Growth CAGR

7%

IT Budget Growth CAGR

Today's data problem

Data is growing at a 28% compound annual growth rate.

How IT and security teams can deal with this tidal wave of data

Complete control over your data

Build a data management strategy tailored for the future.

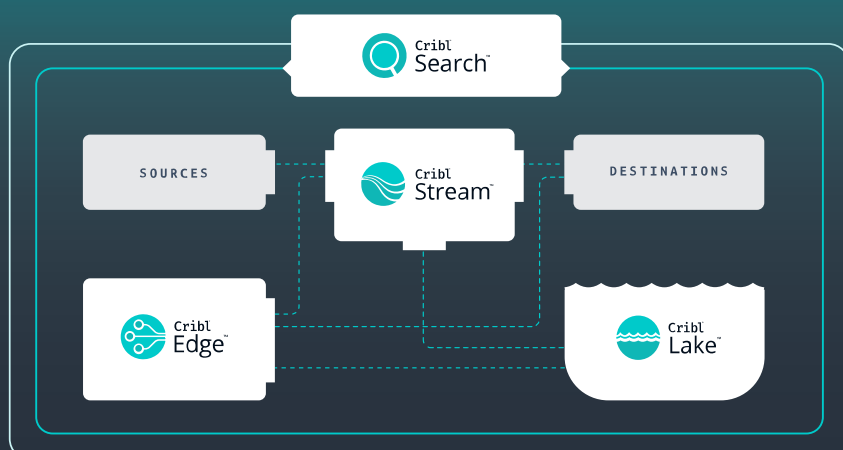

Stretch your investment reduce costs and complexity by consolidating security and observability tools and optimizing resource allocation.

Observe more to build & automate tiered storage, forward only useful data, and access data previously inaccessible.

Simplify data engineering to discover, explore, collect, enrich, and route data anywhere to anywhere.

Flexibility to eliminate the rigidity of predefined schemas and embrace a new approach that adapts to your data's ever-changing nature.

TOMORROW: A DATA ENGINE FOR MODERN IT AND SECURITY OPERATIONS

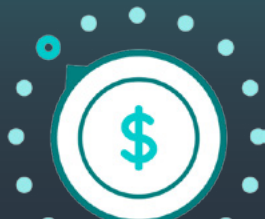

The solution

A unified, open data management solution.

The next generation of data management is a unified approach leveraging open formats that:

Eliminate vendor lock-in.

Optimize your costs by delivering value, not just data.

Connect **any** source to **any** destination.

Be unstoppable with a Data Engine for IT and Security. Analyze, collect, process, and route your data at any scale. Get the choice, control, and flexibility you need for today and in the future.
