SERVICE BRIEF

Cribl.Cloud Migration Service

Cribl
The AI Platform for Telemetry

Why migrate to Cribl.Cloud?

Cribl.Cloud is a scalable, cloud-native platform that enables you to easily access, configure, and manage Cribl services. No need to worry about taking care of infrastructure, scaling, and security — making this the fastest and easiest way to realize the value of your Cribl data engine.

Migration overview

Our Cribl.Cloud Migration Consulting Service offers a streamlined and effective solution to transition from your existing self-hosted Cribl deployment to our state-of-the-art Cribl.Cloud platform. Capitalizing on our extensive expertise and in-depth knowledge of the Cribl ecosystem, we strive to make this shift as seamless as possible, minimizing downtime and mitigating any disruptions to your ongoing operations.

How it works

Our consultants collaborate closely with you to apply our proven migration plan tailored to your unique requirements and constraints. During this phase, an updated architecture document will be created mapping out all requirements for the migration. They also collaborate with all internal Cribl teams to guarantee a seamless and efficient migration process.

The remote Cribl.Cloud migration begins with a thorough evaluation of your current deployment via a screen-sharing session. This involves examining your sources, destinations, routes, and pipeline configurations. Once reviewed, they will be exported and subsequently test-imported into your Cribl.Cloud organization for validation. After verification, the consultant will coordinate a cutover schedule with you.

Throughout the entire migration process, our consultants provide continuous support and guidance to ensure that your team is well-prepared to manage and maintain your Cribl.Cloud configuration. From initial planning to post-migration assistance, our experts are devoted to facilitating a smooth and successful transition to Cribl.Cloud.

Benefits

- Flexible, usage-based pricing so you only pay for what you use.
- Gain access to the full Cribl product suite, including Stream, Edge, Search, and Lake.
- Offload the burden of managing infrastructure, freeing up your team to focus on what truly matters — delivering value to your business.

SKU

PS-CLOUD-MIG – $12,000

Items migrated

The following items will be migrated during the process of moving to Cribl.Cloud:

- Sources and Destinations
- Routes / Direct Connects
- Packs
- Knowledge Objects
- Worker Groups
- Edge Fleet Configurations
- SAML/SSO Configurations
- Notifications

Terms and conditions

Cribl, or an authorized partner, will provide Consulting Services as described in this Service Brief and subject to the applicable Order Form and signed Subscription Services Agreement or other written agreement between Cribl and the Customer.

Out of scope

- Modification of customer hardware including systems and network equipment
- Modification of customer source and destination system configurations
- Persistent Queue data will not be migrated
- Migration of no more than 5 On-Premises Worker Groups
- Any services or activities other than those explicitly specified in this Service Brief

Scheduled meetings

Cribl may perform the Cloud Migration Consulting Services described in this Service Brief during mutually agreed upon scheduled meetings with Customer. Customer agrees to provide at least forty eight (48) hours' prior written notice to cancel, reschedule, or otherwise change the length of a scheduled meeting. If Customer fails to provide such notice, Cribl may charge customer for the full price of the originally scheduled meeting.
