

Infrastructure and Cybersecurity Software Update

Harris Williams | Q2 2023

Infrastructure and Cybersecurity Software Observations and Key Trends

Persistent macrotrends in multicloud, edge computing, and AI/ML continue to drive investor interest in infrastructure and cybersecurity software.

Happening in the Infrastructure and Cybersecurity Software Sector Right Now

DevSecOps

As security incidents become rife in software delivery, there is a lot of pressure on DevOps teams to integrate security into their DevOps practices. Without this integration, DevOps teams cannot optimize the flow of product delivery. As such, organizations are using DevSecOps as a means of effectively integrating security into the software development lifecycle.

Microservices Architecture

Microservices architecture has three core objectives:
 development agility, deployment flexibility, and
 precise scalability. Organizations are focusing on
 microservices as a potential fit for multicloud
 workloads because they enable distributed
 applications and deployment flexibility.

Serverless Computing

Operational simplicity, platform elasticity, and cost savings are the primary drivers for the adoption of serverless computing. Beyond the public clouds, serverless architectures are now being used at the network's edge to achieve just-in-time, personalized user experiences and rapid processing of event data closer to the point of collection.

Infrastructure as code can deliver transformational agility and efficiency via infrastructure automation. Organizations that deploy orchestration and configuration management tools while changing the processes and culture of infrastructure management within their organization will achieve their desired efficiency gains.

AlOps

Enterprises continue to increase their use of AlOps platforms across various aspects of IT operations management. As AlOps becomes more widely used, organizations will mature their use cases across DevOps and site reliability engineering practices.

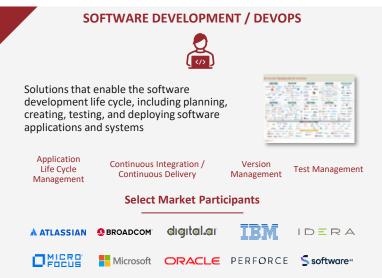

Low-code capability is a long-term trend in software, accelerated by SaaS, APIs, and cloud technologies. Further fueling this trend is the democratization of development and delivery. In the future, business functions need to be more agile and adaptive through owning their own technology, data, and analytics creation.

Infrastructure and Cybersecurity Software Market Landscape

What We're Reading

Deloitte: Cloud Benefits Could Be Maximized Across Business Functions with C-Suite Collaboration

Cloud Managed Services News

"Given the variation in strengths across business functions, C-suite leaders can help broaden their benefit analysis across silos to maximize cloud benefits. Benchmarking via key performance indicators (KPIs) such as cost reduction, process improvement, efficiency, number of innovations, etc., can help prioritize areas where cloud strategy leadership may need to focus to gain more value. These issues are sometimes found after deployment when they can be expensive to fix. Thus, collaboration via dedicated cross-functional teams can be the key to harnessing the full power from cloud."

Forbes: What's Trending in DevOps: Today's Challenges and How to Overcome Them

DevOps News

"DevOps must follow best practices, make training and skill-up investments and put teamwork, security, and ongoing learning and improvement first to overcome these obstacles. To effectively meet the changing demands of business, DevOps will need expertise in a variety of fields, including cloud computing, automation, security, and artificial intelligence, to attain success."

Read the full article here.

McKinsey: Business's 'It's Not My Problem' IT Problem

IT Operations Management News

"For most businesses, the technology capability is crucial to staying competitive and is likely to remain so. In many of our company reviews, we find that the business side of the house is consistently behind when it comes to building bridges to IT. The sooner the business treats IT as a strategic capability, the sooner it can harness the technology it needs to deliver value."

VentureBeat: 5 Key Cybersecurity Trends for 2023

Cybersecurity News

"The cybersecurity landscape in 2023 includes an acceleration of familiar and emerging trends, which means businesses should be ready to face an ever-changing environment where risk is inherent. In today's cyber climate, no fish is too small for an attacker to try to hook. Thus, SMBs have more reason than ever to be proactive around security, as these key trends target an expanding attack surface and increased risks."

Select Q2 2023 Infrastructure and Cybersecurity Software Transactions

Hewlett Packard Enterprise's Pending Acquisition of Axis Security

axis

Target

Hewlett Packard Enterprise

Buyer

Announced March 2, 2023

EV: \$500M

EV / LTM Revenue: NA EV / EBITDA: NA

- Axis Security is a provider of a cloud security platform designed to offer secure access to business applications. The company's platform allows access based on a zero-trust business-centric approach.
- Post-transaction, HPE will enhance its edge-to-cloud security capabilities by offering a unified secure access services edge solution to meet the increasing demand for integrated networking and security solutions.

Silver Lake's Pending Acquisition of Qualtrics

qualtrics

Target

SILVERLAKE

Buyer

Announced February 24, 2023

EV: \$10.9B

EV / LTM Revenue: 7.5x EV / EBITDA: NM

- Qualtrics is a provider of a customer experience management platform that focuses on collecting, organizing, and understanding important data relative to customers and employees to deliver actionable insights.
- Upon completion of the acquisition, Qualtrics will become a privately held company positioned to drive category-defining innovation and efficient growth at scale with the capital support of Silver Lake.

Francisco Partners' Pending Acquisition of Sumo Logic

sumo logic

Target

FP FRANCISCO PARTNERS

Buyer

Announced February 9, 2023

EV: \$600M

EV / LTM Revenue: NA EV / EBITDA: NA

- Sumo Logic is a provider of a software analytics platform for reliable and secure cloud-native applications. The
 company's multi-tenant platform provides real-time data analytics and insights across observability and security.
- Upon completion of the acquisition, Francisco Partners' expertise, capital support, and operational capabilities will help Sumo Logic drive accelerated growth and continue its long heritage of product innovation.

Progress Software's Acquisition of MarkLogic

Target

Buyer

February 7, 2023

EV: \$1.4B

EV / LTM Revenue: 4.7x

EV / EBITDA: NM

- MarkLogic is a provider of a metadata refining platform that helps customers store, manage, search, navigate, and deliver content and toolkits for the integration of documents.
- Post-transaction, MarkLogic will enhance Progress Software's commitment to delivering the products to develop, deploy, and manage applications by providing a unified, enterprise-grade semantic data platform.

Dell's Acquisition of Cloudify

Target

Buyer

January 26, 2023

EV: \$100M

EV / LTM Revenue: NA

EV / EBITDA: NA

- Cloudify is a provider of a platform for cloud orchestration and infrastructure automation. The company's tools are used by DevOps engineers to manage containers, workloads, and more across hybrid environments.
- Dell's acquisition of Cloudify will allow the company to continue to innovate its edge offerings, boost its cloud orchestration capabilities, and strengthen its overall services business line.

Microsoft's Acquisition of Fungible

Target

Buyer

January 5, 2023

EV: \$190M

EV / LTM Revenue: NA EV / EBITDA: NA

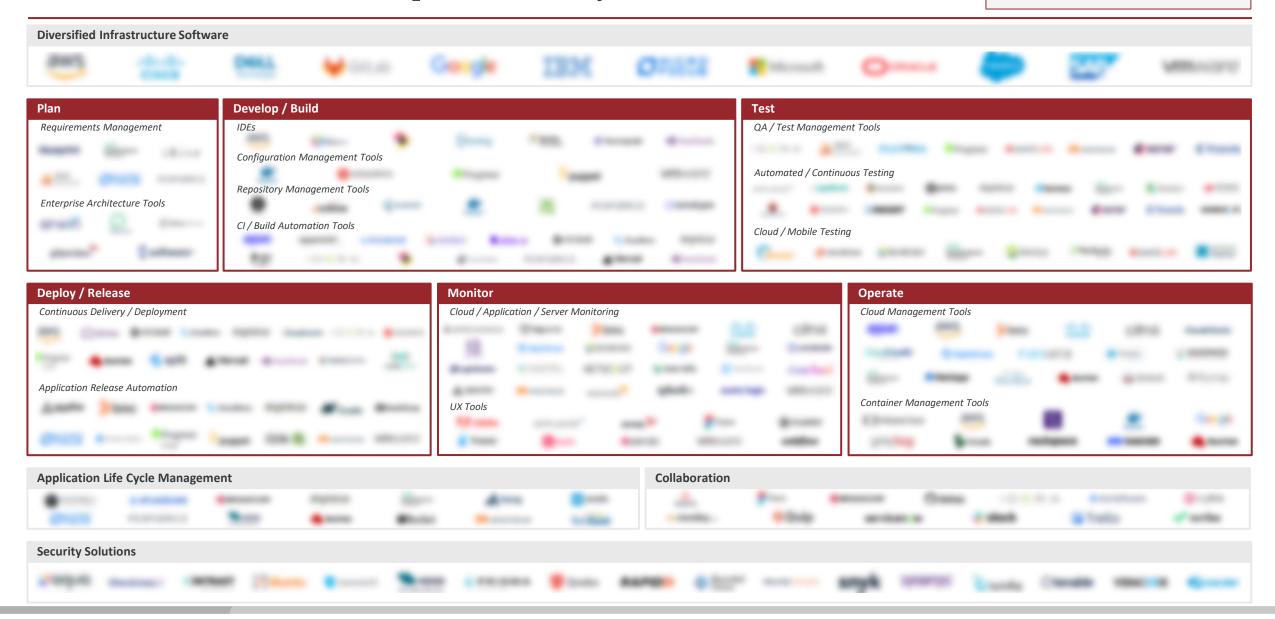

- Fungible is a provider of infrastructure software aimed at accelerating networking and storage performance in datacenters. The company helps to improve the economics, security, and reliability of cloud data centers.
- The acquisition further signals Microsoft's commitment to long-term differentiated investments in datacenter infrastructure, enhancing the company's broad range of technologies and solutions in the sector.

Harris Williams Infrastructure and Cybersecurity Software and Services Experience

Selected Infrastructure and Cybersecurity Software Experience

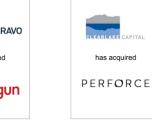

Harris Williams Client Engagement

a portfolio company of

RLH Equity Partners

has been acquired by

Company Background

Utegration is a full-service consulting and solutions provider specializing in analytics, SAP technology, and SAP-certified products for the utilities and energy sectors. Utegration builds and optimizes new technology for finance, regulatory, customer management, and asset operations to maximize clients' return on investment, while minimizing risk and complexity. Their industry experts have earned the trust of energy and water providers across North America with outcome-driven road maps and a track record of successful implementations.

Successful Outcome

The transaction delivered a successful outcome for Utegration and Cognizant. The acquisition will extend Cognizant's SAP capabilities for energy and utilities clients, allowing the partnership to deliver a strong new set of capabilities designed to address the market's critical transformation needs.

Harris Williams served as financial advisor to Utegration in this transaction.

Harris Williams Client Engagement

a portfolio company of

RLH Equity Partners

has been acquired by

Company Background

Inspirage delivers end-to-end transformational initiatives solving the most critical supply chain challenges for product-based companies. The company provides deep industry expertise and unparalleled knowledge of Oracle's cloud-based applications to deliver consulting, IP, and implementation solutions spanning product life cycle management, supply chain management, logistics, ERP (enterprise resource planning), finance, enterprise performance management, and digital transformation. Inspirage partners with its customers to break down information silos and optimize performance to accelerate innovation, fuel growth, and achieve operational excellence.

Successful Outcome

The transaction delivered a successful outcome for Inspirage and Accenture. The acquisition will further enhance Accenture's Oracle Cloud capabilities, helping the combined partnership accelerate innovation for clients through emerging technologies.

Harris Williams served as financial advisor to Inspirage in this transaction.

Harris Williams / GLOBAL M&A ADVISOR

Harris Williams is a global investment bank specializing in M&A advisory services. Clients worldwide rely on us to help unlock value in their business and turn ambitious goals into reality. We approach every engagement with boundless collaboration, pooling expertise and relationships across industries and geographies to uncover the unique story of each company.
