3RD BRAKE LIGHT MOUNT

Drill-Free Rooftop Mounting

ECCO's 3rd Brake Light Mount offers a secure, drill-free way to install warning lights on the roof of popular pickup models including Ford F-150, Dodge RAM, Chevy Silverado and GMC Sierra single cab. Utilizing the existing hole behind the OEM 3rd brake light, this mounting solution eliminates the need to drill into the vehicle roof, preserving vehicle integrity and resale value. Designed for both permanent and semi-permanent applications, this platform supports a wide range of warning lights including lightbars, minibars, beacons, Safety Directors™ and remote spotlights. Its low-profile design seamlessly integrates with the vehicle's roofline, featuring a sleek black powder-coated finish. These mounts are universally compatible with LED or halogen 3rd brake light vehicles.

Models

PART NO.	VEHICLE MODEL	COLOR
EZ3301B	2015+ F150, 2017+ F250, F350	Black
EZ3302B	2019+ Ram Classic, 2500, 3500	Black
