SOLUCIONES DE QUITANIEVES DE CAMIONETAS | SOLUTIONS POUR CAMIONNETTES CHASSE-NEIGES

FEATURED PRODUCT EW4009

THREE 47-WATT LEDs

Replace headlights while melting the snow and ice away with EW4009's heated lenses. These LEDs are weather-resistant and deliver 80,000+ hours of maintenance-free operation with surprisingly low amp draw. The high intensity light output and CE rating make the EW4009 a perfect fit for a variety of DOT applications.

Reemplace los faros y derrita la nieve y el hielo con los lentes calefaccionados EW4009. Estos LED son resistentes al clima y ofrecen más de 80 000 horas de funcionamiento sin mantenimiento con un consumo de amperios sorprendentemente bajo. La salida de luz de alta intensidad y el marcado CE hacen del modelo EW4009 un ajuste perfecto para una variedad de aplicaciones DOT.

Remplacez les phares et faites fondre la neige et la glace avec les lentilles chauffantes du modèle EW4009. Ces LED sont résistantes aux intempéries et offrent plus de 80 000 heures de fonctionnement sans entretien avec une consommation en ampères étonnamment faible. Le flux lumineux à haute intensité et le marquage CE font du modèle EW4009 une solution idéale pour une grande variété d'applications DOT.

FEATURED PRODUCT EW4012

DOT LED LIGHT

The EW4012 LED worklight is feature packed with cutting-edge technology and unparalleled brightness. Featuring low beam, high beam, running light, and turn indicators, this LED headlight is DOT certified for all vehicles. An automatic heated lens melts through snow and ice while a flush lens design prevents buildup to ensure optimal visibility in all weather conditions. The warm LED color temperature (3,500 Kelvin) further enhances visibility in rain and snow driving conditions, minimizing high beam blindness.

La luz de trabajo LED EW4012 incorpora tecnología de vanguardia y un brillo inigualable. Con luces bajas, luces altas, luces de posición e intermitentes, este faro LED cuenta con certificación DOT para todos los vehículos. Su lente calefactable automática derrite la nieve y el hielo, mientras que su diseño al ras evita la acumulación de hielo para garantizar una visibilidad óptima en cualquier condición climática. La cálida temperatura de color del LED (3500 Kelvin) mejora aún más la visibilidad al conducir con lluvia y nieve, minimizando la ceguera causada por las luces altas.

Le phare de travail à LED EW4012 bénéficie d'une technologie de pointe et d'une luminosité inégalée. Doté de feux de croisement, de feux de route, de feux de position et de clignotants, ce phare à LED est certifié DOT pour tous les véhicules. Sa lentille chauffante automatique dissout la neige et la glace, tandis que sa conception affleurante prévient l'accumulation de neige pour une visibilité optimale par tous les temps. La température de couleur chaude des LED (3 500 kelvins) améliore encore la visibilité sous la pluie et la neige, minimisant ainsi l'éblouissement dû aux feux de route.
