

DIGITAL ALERT TECHNOLOGY

HA-5 CONNECTED SAFETY SOLUTION

Powered by HAAS Alert Technology

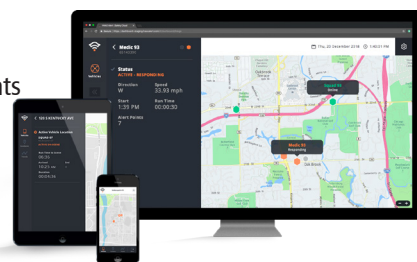

ECCO teams up with HAAS Alert to reduce vehicle collisions and increase visibility with the HA-5 Connected Safety Solution. HAAS Alert technology, paired with ECCO's lineup of reliable lighting and safety solutions, sends digital alerts that warn drivers of approaching or nearby service vehicles. When warning lights are engaged, the HA-5 activates and broadcasts a signal to the Safety Cloud. Connected devices or systems receive the digital signal from the Safety Cloud and an alert is transmitted through an app on drivers' mobile devices or in-vehicle displays.

Models

PART NO.	TYPE	MOUNT	CELLULAR SIGNAL	VOLTAGE
HA-5	Alert System	Dash	3G or 4G LTE	12V

Features and Benefits

- Connects any flashing or warning lights
- Cellular, GPS, real-time Safety Cloud connectivity
- 100% hands-free operation
- Automatic Waze integration
- Securely mounts on vehicle's dash
- Monthly performance reports
- Low voltage shut-off eliminates parasitic draw
- Data included, no additional plan required
